DIRECTORS DISCLOSURES ON SELF DEALING AND RELATED PARTY TRANSACTIONS³

There were no transactions with directors that are not in the ordinary course of business of the Company.

Details of the Related Party Transaction are discussed under Notes 1 (General Corporate Information) and 18 (Related Party Transaction) of the Notes to the Consolidated Financial Statements of the Company for the year ended 2024. The related party transactions have been evaluated and executed on a fair and arm's length basis, in accordance with Company's policies and under what the Company believes to be terms and conditions as may reasonably be obtained from non-related third parties.

LEGAL PROCEEDINGS

Complaints against D&L subsidiary, Oleo Fats, Incorporated (OFI), and some of OFI's officers, were filed by the Bureau of Internal Revenue (BIR) before the Department of Justice (DOJ) for alleged tax evasion and failure to supply correct information for taxable years 2019 and 2020. The complaint specifically alleged that OFI used ghost purchases to overstate its expenses and reduce taxable income for the said years. The Company maintains that it has never engaged in such practice and that none of OFI's purchases are fictitious. Relevant documents showing that the purchases were real were already submitted to the DOJ. As of date, the case is still pending resolution before the DOJ.

Aside from the above case, the Company is not a party to any litigation or arbitration proceedings of material importance, which could be expected to have a material adverse effect on the Company or on the results of its operations. No litigation or claim of material importance is known to be threatened against the Company or any of its properties.

CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Details of the Related Party Transaction are discussed under Notes 1 (General Corporate Information) and 18 (Related Party Transaction) of the Notes to the Consolidated Financial Statements of the Company for the year ended 2024. The related party transactions have been evaluated and executed fairly in accordance with Company's policies and under what the Company believes to be terms and conditions as may reasonably be obtained from non-related third parties.

There were no transactions with directors, officers or any principal stockholders (owning at least 10% of the total outstanding shares of the Company) that are not in the ordinary course of business of the Company.

The Company has a Manual on Corporate Governance which aids the Company in monitoring and assessing the level of the Company's compliance with practices on good corporate governance, which are consistent with the relevant Philippine laws and regulations. With the aid of its committees, the Board of Directors shall be primarily responsible for the governance of the Company and shall, hence, ensure compliance with the principles of good corporate governance.

The Company's Manual on Corporate Governance outlines specific investor's rights and protections and enumerates particular duties expected from the Board members, officers and employees. It also features a disclosure system, which highlights adherence to the principles of transparency, accountability and fairness. A compliance officer is tasked with the formulation of specific measures

to determine the level of compliance with the Manual by the Board members, officers and employees. There are no known material deviations from the Company's Manual of Corporate Governance.

For compliance with leading practices on corporate governance, please refer to the latest i-ACGR which can be accessed through the Company's website at this link: <https://dnl.com.ph/wp-content/uploads/2025/06/2024-I-ACGR-DL-Industries-Inc.-PSE.pdf>. The Company will submit its I-ACGR covering the year 2024 on or before the deadline set by the SEC.

In addition, the Company has a Code of Business Principles (CoBP) which encapsulates the Company's general policies relative to its stakeholders. The CoBP contains policies on customer's welfare, dealing with suppliers and the government, whistle blowing, community welfare, the environment and sustainable development and employee welfare. The COBP can be accessed through the Company's website at this link: <https://dnl.com.ph/wp-content/uploads/2019/02/DnL-Code-of-Business-Principles.pdf>. The Company's programs for employee health, safety and welfare and training and development are presented in the ACGR.

The Company is taking further steps to enhance adherence to principles and practices of good corporate governance.

Item 19. Voting Procedures

1. Manner of Voting

Method: Straight and Cumulative Voting

In all items for approval except election of directors, each share of stock entitles its registered owner to one vote.

In case of election of directors, each stockholder may vote such number of shares for as many persons as there are directors to be elected or he may cumulate said shares and give

one nominee as many votes as the number of directors to be elected multiplied by the number of his shares equal, or he may distribute them on the same principle among as many nominees as he shall see fit, provided that the whole number of votes cast by him shall not exceed the number of shares owned by him multiplied by the whole number of directors to be elected.

2. Vote required for approval

Unless a different requirement is imposed by the Corporation Code and other relevant laws, the vote of stockholders representing at least a majority of the issued and outstanding capital stock entitled to vote is required.

3. Methods of Counting Votes

Each share shall be counted as one (1) vote.

The votes will be tabulated by the stock and transfer agent and verified by the accounting firm of Isla Lipana & Co (formerly Joaquin Cunanan PricewaterhouseCoopers).

UPON THE WRITTEN REQUEST OF A STOCKHOLDER, THE COMPANY UNDERTAKES TO FURNISH SAID STOCKHOLDER A COPY OF THE COMPANY'S ANNUAL REPORT ON SEC FORM 17-A AND THE LATEST QUARTERLY REPORT ON SEC FORM 17-Q, FREE OF CHARGE. ANY WRITTEN REQUEST FOR A COPY OF SEC FORM 17-A AND 17-Q SHALL BE ADDRESSED TO:

PART I - BUSINESS AND GENERAL INFORMATION

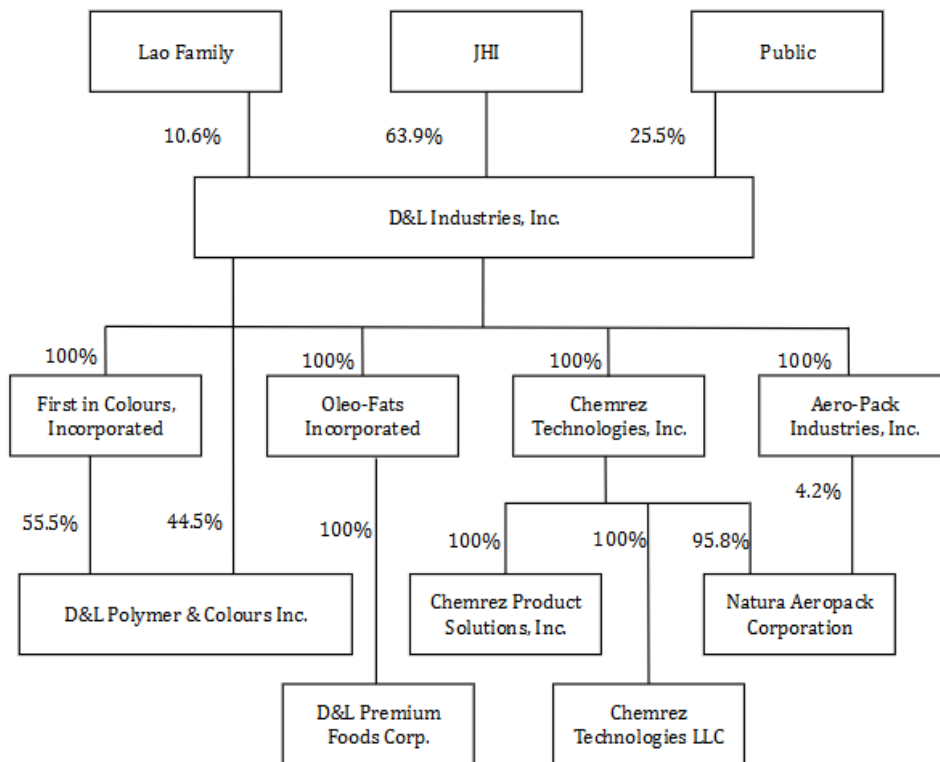

Item 1. Business

The Company

D&L Industries, Inc. (the “Company” or “D&L”) was incorporated on July 27, 1971. The Company is a publicly listed company, which is 74.5% beneficially owned by the Lao family and 25.5% by the public as of December 31, 2025. The Company’s registered office address and principal place of business is 65 Calle Industria, Bagumbayan, Quezon City.

The Company is the holding company for a group of companies engaged in product customization and specialization for the food, chemicals, plastics and consumer products ODM (Original Design Manufacturing) industries. The company’s principal business activities include manufacturing of customized food ingredients, oleochemicals for personal and home care use, and specialty raw materials for plastics. It also renders management and other services to subsidiaries and affiliate companies. It was officially listed on the Philippine Stock Exchange (PSE) on December 12, 2012.

The following diagram shows the corporate structure of the Company, excluding beneficial ownership of securities held by the Lao family members. As of December 31, 2025, the Company is 63.9% owned by Jadel Holdings Co., Inc. (JHI) and 10.6% owned by the Lao Family. The remaining 25.5% of the shares outstanding are publicly held.

D&L's major subsidiaries and their corresponding dates of incorporation with the SEC are as follows:

Overview of the Business

The Company today is principally a holding company, which derives the majority of its income from subsidiaries engaged in four principal business lines, as set out below:

- Food ingredients* – The Company, operating through its subsidiary Oleo-Fats, Incorporated (OFI) and D&L Premium Foods Corp (DLPF), manufactures a line of bulk and specialty fats and oils, culinary and other specialty food ingredients. The Company contract manufactures and provides food ingredient products to most of the leading food manufacturers and quick-service restaurant chains in the Philippines, and also produces food safety solutions such as cleaning and sanitation agents for various customers.
- Oleochemicals, resins and powder coatings* – The Company, through Chemrez Technologies, Inc. (CTI) and its subsidiaries Chemrez Product Solutions, Inc. (CPSI) and Natura Aeropack Corporation (NAC), focuses on developing, manufacturing, and supplying high value customized resins, oleochemicals, and specialty products that are sustainable and cost-efficient, while enabling customers to build bigger markets. Its customer base includes many industries such as biofuels, personal and home care, health and nutrition, and construction industries. CTI and CPSI serve local and international customers.
- Colorants and plastics additives* – The Company, operating through its subsidiaries First in Colours, Inc. (FIC) and D&L Polymer and Colours, Inc. (DLPC), develops and manufactures innovative plastic solutions that make plastics aesthetically appealing, functional, and sustainable. The group's products are mainly classified as plastic colorants, additive masterbatches, and engineered polymers. Plastic colorants give plastics precise coloring and special effects mainly used for brand and product identification. Additive masterbatches add functional features to plastics such as higher processability, antimicrobial properties, and anti-static properties. Meanwhile, engineered polymers are plastic compounds that have improved mechanical and thermal properties that make them ideal for films, bottles, furniture, appliances, electronic and automotive parts, etc. Lastly, the group offers sustainable options such as compostable plastics, biodegradable plastics, bio-based plastics, recycled compounds, and upcycled materials.
- Consumer Products ODM* – The Company, operating through its subsidiary Aero-Pack Industries, Inc. (API), and Natura Aeropack Corp., (NAC), is a full original design manufacturer (ODM) and original equipment manufacturer (OEM) that offers customized aerosols and non-aerosols products to other businesses across different industries such as home care, personal care, and maintenance chemicals. The Company offers a full turnkey solution from product formulation to design, packaging, production, and delivery to customers. It is the first and the biggest aerosol manufacturing company in the Philippines with almost all of its sales coming from the domestic market.

Principal Products, Markets and Revenue Contribution

Food Ingredients

The Company, through OFI and DLPP, markets and distributes a line of bulk edible oils and specialty food ingredients. The Company believes that it is the leading manufacturer of bulk and specialty fats and oils and other food ingredients in the Philippines. It serves customers across the food and beverage industry, including manufacturers of instant noodles and snack food, dairy and culinary, food service, biscuits and confectionery and bakeries, as well as domestic and international quick-service restaurant chains. The Company also serves as a contract manufacturer of food ingredient products for certain customers. The Company's product line has expanded to thousands of varieties of food ingredients, including specialty fats, dry and liquid mixes, and specialty condiments, driven by its ability to create customized products according to its customers' requirements.

In addition to food ingredients and oils, the Company provides food safety solutions and services such as customized cleaning and sanitation systems designed and manufactured to meet the needs of customers. All of the Company's food safety solutions are supported by professional and technical services.

Oleochemicals, Resins, and Powder Coatings

The Company, through Chemrez Technologies, Inc. (CTI) and its subsidiary Chemrez Product Solutions, Inc. (CPSI), and through NAC, focuses on developing, manufacturing, and supplying high value customized resins, oleochemicals, and specialty products that are sustainable and cost-efficient, while enabling customers to build bigger markets. Its customer base covers industries such as personal and home care, biofuels, health and nutrition and construction. CTI and CPSI serve both local and international customers.

Oleochemicals – CME/biodiesel

Under its Oleochemicals division, Chemrez manufactures both commodity biodiesel and high-margin oleochemicals.

The Company's biodiesel facility operates under an integrated management system certified to ISO 9001, ISO 45001, and ISO 14001, and is recognized as the pioneer continuous-process methyl ester facility in the Philippines. The facility and its coco-biodiesel products are accredited by the Department of Energy (DOE) and registered with the Board of Investments with pioneer status.

Chemrez plays a significant role in the National Biofuels Program under RA 9367, or the Biofuels Act of 2006. The mandated biodiesel blend currently stands at three percent (B3), following its increase from two percent (B2) on October 1, 2024. As one of the DOE-accredited biodiesel producers in the country, the Company leverages its strong track record in quality, delivery, and cost competitiveness to position itself as a preferred domestic supplier to oil companies and institutional buyers. Its robust quality management systems, along with continued investments in logistics infrastructure and supply chain capabilities, support the reliable bulk supply of compliant biodiesel while enabling cost efficiencies that benefit its customers.

Beyond biodiesel, Chemrez also produces a range of high-margin oleochemicals. These include glycerin and other coconut methyl ester (CME) derivatives, which are primarily used as surfactants and foaming agents in personal and home care products, as well as medium-chain triglyceride (MCT) oil derived from coconut oil. These products are sold predominantly in export markets. To further strengthen its position, the Company continues to develop new CME applications, leveraging proprietary process technologies to expand its product portfolio and capture additional high-value export opportunities.

Other Specialty Chemicals

The Company has a solid record of experience and expertise in the manufacture and marketing of powder coating, resins, and other specialty resin-based chemicals.

- Powder coatings are protective materials applied to metal and other surfaces through an electrostatic coating process to provide resistance against heat, weather and UV light, and certain chemicals. It is used in home appliances, metal furniture, fixtures and fittings, mechanical parts, tools and equipment and also in the construction industry.
- Resins are polymerized or chemically modified substances, which are manufactured in a variety of technical specifications to suit specific industry uses, end-user applications, and customer requirements. It includes polystyrene resins for the plastics industry, polymer emulsions for the paint industry, and polyester resins for the construction, shipping, and furniture industries.
- Other specialty resin-based chemicals consist of additives, colorants, and solvents.

The Company has maintained its market leadership in powder coatings and resins through competitive pricing, consistent quality, and the ability to offer product customization and provide on-site after-sales technical support to customers. The Company also continues to invest in research and development to develop new powder coating and resin products with improved and innovative features. It competes mainly against importers and traders.

The Company attributes its strong market position to several factors. Its operating scale allows it to manufacture products at highly competitive costs. Beyond price competition, the Company has established long-standing relationships with its customers. These partnerships allow the Company to respond quickly to customer requirements and offer newer and better products out of its extensive efforts and achievements in research and development.

Colorants and Plastics Additives

The Company, through its subsidiaries FIC and DLPC, manufactures custom designed and formulated pigment blends, color and additive masterbatches and engineered polymers for a wide range of applications in the plastics industry. FIC focuses on the domestic market, while DLPC focuses primarily on the export market.

The Company believes it has the longest history in the Philippine plastics color and compound industries, and its brands have been trusted by customers for over 50 years for their color concentrate requirements for films, tapes, moldings, wires and cables, high-end fibers and other engineered polymers. The Company at various times has entered into technical assistance agreements with select international partners to increase its expertise in terms of research and development. Also, the Company works with customers to create color products and solutions that best represent the customer's products in the market, with research showing that a product's color and appearance are key factors in a consumer's buying decision and a critical element in the successful marketing of products. The state-of-the-art technology used by the Company has given end-user customers a broad range of color choices and forms.

The Company also provides additives for plastics processed by customers that enable reduced production costs or add desirable features and properties to plastics. Appropriate filler additives can reduce production costs by substituting polymers with relatively inert and inexpensive materials that make the end product cheaper by weight. Filler additives may also increase the performance of a plastic by modifying its properties, as additives contribute a wide range of properties to plastic products. For example, additives can make plastic products biodegradable and compostable. Additives can also lower the flammability of plastics used in household items, reduce friction between plastic parts, or increase a plastic's resistance to degradation caused by light sources for items such as outdoor furniture.

In addition to providing colorants or additives to customers for their own processing, the Company also provides custom engineered polymers, or engineered polymers, designed to have the precise color and properties required by the customer. Custom compounded products are delivered as plastic pellets to the customer's production plant for conversion into end-use products.

The Company also offers its customers toll compounding services. Toll compounding services enable customers to offer specialty compounds branded with their own label. Customers may take advantage of the Company's extensive engineering and manufacturing experience to handle production and logistics, increasing their effective manufacturing capacity without incurring expansion costs.

Consumer Products Original Design Manufacturing

The Company, operating through its subsidiary Aero-Pack Industries, Inc. (API), and NAC, is a full original design manufacturer (ODM) and original equipment manufacturer (OEM) that offers customized aerosols and non-aerosols products to other businesses across different industries such as home care, personal care, and maintenance chemicals. The Company offers a full turnkey solution from product formulation to design, packaging, production, and delivery to customers. It is the first and the biggest aerosol manufacturing company in the Philippines with almost all of its sales coming from the domestic market.

Management and administration

D&L maintains significant operational control of OFI, DLPF, FIC, DLPC, CTI, CPSI, API and NAC as well as of several affiliate companies that provide goods and services complimentary to those provided by the Company, including FIC Marketing, Inc., FIC Tankers Corporation, Consumer Care Products, Incorporated and LBL Prime Properties Incorporated, among others, through a contractual "shared services" model. In particular, D&L Industries provides the following services to its subsidiaries and affiliate companies:

- *Executive Management* - including supervision of all business operations;
- *Administrative Support* - including finance, treasury, accounting, internal audit, human resources, information technology and legal services;
- *Logistics Support* - which includes warehousing, distribution and delivery, transportation fleet management, tank farm management, port clearing and procurement; and
- *Technical Services* - which include research and development, quality control and assurance and use of trademarks. The technical services for all business operations are concentrated in D&L's research and development department, which the Company believes has been a critical driver for the success of each of its business lines.

D&L maintains its own analytical laboratory that provides technical services and is located in its headquarters in Quezon City, Metro Manila. While D&L continues to provide management services for this facility, specific research, development and application activities are conducted, and expenses are incurred, by OFI, FIC (including DLPC), Chemrez Technologies, and Consumer Products ODM independently. D&L's and its subsidiaries' research laboratories employ highly qualified chemical engineers, chemists, consultants, technicians and support staff who service the customers of the Company in various industries.

General Operations

- Additional discussion on other business risks are also provided in Note 22 of the 2025 Consolidated Audited Financial Statement of the Company attached herein.
- The Company, in the ordinary course of business, transacts with related parties. These transactions include the purchase/sale of goods and services. Details of the Related Party Transaction are discussed under Notes 18 (Related Party Transaction) of the Notes to the Consolidated Financial Statements of the Company.
- As of December 31, 2025, the Company and its subsidiaries have a total of 1,522 employees. There are ancillary processes however that are serviced by different outsourced providers. None of the employee groups have a collective bargaining agreement. The Company does not expect any significant change in its existing workforce level for 2026.

Management of Key Risks related to the Company

Risks relating to the Philippines

As of end-2025, 74% of the Company's consolidated revenues are domestic. With a substantial portion of its business conducted and all of its assets located in the Philippines, the Company is exposed to risks associated with the Philippines, including political instability, exchange rate fluctuations, and occurrence of natural disasters such as typhoons and earthquakes.

The Company has put contingency plans in place to mitigate both natural and man-made incidents. These include centralized fire protection and disaster prevention systems. The Company also self-insures by maintaining a relatively high level of asset liquidity in the form of cash and cash equivalents and receivables, to protect its businesses against other potential risks. As of end-2025, cash and cash equivalents were 6.4% of the Company's total consolidated assets.

Risk relating to failure to keep up with technological innovation

The Company derives 46% of its consolidated revenues from high margin specialties. These are innovation-driven products, mostly tailor-made to the customer's needs. The higher the level of customization involved, the higher the profitability. Failure to anticipate and meet the requirements of our customers, as well as keep pace with evolving technological innovations in its markets might adversely impact business activities and profitability.

To make sure that the Company can respond effectively and efficiently to market needs, about 21% of its workforce is in the technical department (R&D and IT). These employees pursue various research and development activities, including product development and application, as well as quality assurance.

Risk from volatility in raw material prices

As a manufacturing company, 84% of total costs and expenses are raw materials, primarily palm oil, coconut oil, and other types of vegetable oils, as well as monomers, polymers, and other chemicals. Prices of these raw materials tend to be volatile and the Company's ability to pass on significant changes in the cost of raw materials to customers is largely dependent upon contractual relationships and market conditions.

The Company does not fix the selling price for most of its contracts with customers. Prices for the contracts are reset every 30-45 days on average, enabling the Company to pass on relevant price changes in raw material costs.

Risk from customer concentration

The Company's largest customers account for a sizable portion of the business. The top three largest customers, mostly OFI & CTI customers, accounted for 18% of consolidated revenues in 2025. These customers are large multinational and local corporations. Significant changes in any of these customers' purchases might have material impact on the Company's businesses and profitability.

The products sold to these customers are mostly customized for which the Company is almost the sole supplier, in turn generating a stable base of sales volume for the Company. Nonetheless, cognizant of the risk of customer concentration, the Company continues to work closely with customers in order to get good demand visibility. Part of managing risks associated with customer concentration is assessing such risks against operational and strategic factors including economies of scale and knowledge accumulation.

Risk associated with the identity of the company's controlling shareholders

The Company is effectively controlled by the Lao Family and their interests may differ significantly from the interests of other shareholders.

Through direct and indirect interests, the Lao Family effectively controls the Company and its subsidiaries. Mr. Dean A. Lao, Jr., Mr. Vincent D. Lao, Mr. Lester A. Lao and Mr. Alvin D. Lao, along with other second-generation members of the Lao Family, serve in various capacities as officers and directors of the boards and officers of D&L Industries and its subsidiaries. These positions allow the Lao Family to control shareholder decisions and exercise significant control over decisions of the Board in D&L Industries and each of its subsidiaries.

The Company has a track record of good corporate governance. From the time of its public listing on December 12, 2012, D&L and its key officers have been recognized by certain award-giving bodies as one of the best in the Philippines and the ASEAN region such as those cited below.

Finance Asia, a financial publication in the ASEAN region, named D&L as the country's 3rd best mid-cap company in 2014, best mid-cap company in 2015 and 2016, 2nd best mid-cap company in 2018, and best mid-cap in 2019. D&L also ranked as 7th best in the investor relations category.

New York-based *Institutional Investor* has named D&L as among the Most Honored Companies in ASEAN in 2017, 2019, 2020, 2022, and 2024. The Company's investor relations program, ESG and corporate governance initiatives were likewise recognized as among the best in the country.

The Institute of Corporate Directors (ICD) awarded D&L a one-Golden Arrow recognition from 2019 to 2023, followed by a two-Golden Arrow recognition in 2024 and a three-Golden Arrow recognition in 2025. ICD evaluates companies in five areas: right of shareholders, equitable treatment of shareholders, role of stakeholders, disclosure and transparency, and responsibilities of the Board.

Six of the seven members of the Board of Directors of the Company are non-executive officers, with four independent directors. Independent directors also chair several committees of the Board of directors such as audit, corporate governance, related-party transaction, and risk oversight.

Item 2. Properties

Real Properties

The Company does not own any land and operates an asset-light business model. It leases real property, barges, and storage tanks used in its businesses from related parties LBL Prime Properties Incorporated, Ecozone Properties, Inc., FIC Tankers, Inc., and FIC Marketing, Inc., as well as from other third-party lessors. The Company's lease agreements are typically for a period of one to five years and are renewable unless terminated by either party. Lease rates are all on an arm-length basis, and annual escalations are done at reasonable levels. None of the Company's properties used in its operations are subject to any material liens, encumbrances or restrictions of use.

To support the Company's centralized distribution and motor pool functions, the Company owns 73 delivery trucks, with a total capacity of 2,053 MT. The Company also contracted 6 cargo barges owned by affiliates with an aggregate capacity of approximately 10,400 MT.

The company's supply chain facilities are ISO 9001 (quality), ISO 14001 (environmental), ISO 45001 (Occupational Health and Safety) certified which indicate its commitment to excellence in quality, delivery, care for the environment, health and safety of its employees, and cost competitiveness to its customers. In addition, OFI's facility is FSSC 22000 (Food Safety Standard Certification) and HALAL certified.

The Company's analytical laboratory has received accreditation for ISO 17025:2017 Chemical Testing from the Philippine Accreditation Bureau under the Department of Trade and Industry. This accreditation confirms the lab's commitment to high-quality facilities and personnel, and is valid through April 2, 2029.

Intellectual Properties

The Company believes that all proprietary product names, devices and logos used by the Company and its subsidiaries are registered with or are covered by a pending Application for Registration with the Intellectual Property Office of the Philippines, and have been filed or are owned by the Company.

As of December 31, 2025, the Company and its affiliates hold over 439 trademarks covering a wide range of products such as resins, colorants, foam concentrates, fats and oils, powder coating and biofuel compounds; among others.

Item 3. Legal Proceedings

Complaints against D&L subsidiary, Oleo Fats, Incorporated (OFI), and some of OFI's officers, were filed by the Bureau of Internal Revenue (BIR) before the Department of Justice (DOJ) for alleged tax evasion and failure to supply correct information for taxable years 2019 and 2020. The complaint specifically alleged that OFI used ghost purchases to overstate its expenses and reduce taxable income for the said years. The Company maintains that it has never engaged in such practice and that none of OFI's purchases are fictitious. Relevant documents showing that the purchases were real were already submitted to the DOJ. As of date, the case is still pending resolution before the DOJ.

Aside from the above case, the Company is not a party to any litigation or arbitration proceedings of material importance, which could be expected to have a material adverse effect on the Company or on the results of its operations. No litigation or claim of material importance is known to be threatened against the Company or any of its properties.

Item 4. Submission of Matters to a Vote of Security Holders

There were no matters submitted during the fourth quarter of the fiscal year covered by this report to a vote of security holders, through the solicitation of proxies or otherwise.

Item 6. Management’s Discussion and Analysis of Financial Condition, Changes of Financial Conditions and Result of Operations

As at December 31, 2025, 2024 and 2023, the consolidated financial statements include the Company and 100% of its subsidiaries, namely: FIC, DLPC, OFI, API, CTI, CSPI, NAC, DLPF, and CTI LLC.

FY2025 versus FY2024

Results of Operations

- Reported net income available to common shareholders increased by 11% to P2.6 billion in 2025 from P2.3 billion in 2024, or earnings per share of P0.36 versus 2024’s P0.33.
- Consolidated revenues reached ₱55.4 billion in 2025, representing a 36% increase from ₱40.7 billion in 2024. The growth was driven by a combination of higher sales volumes and increased raw material costs, which were passed on to customers.
- Gross profit for the year increased by 15% to P7.2 billion from P6.3 billion in 2024, mainly due to higher sales volume for the year.
- Selling and marketing expenses increased by 10% to ₱1.7 billion, primarily driven by higher delivery costs associated with increased sales volumes.
- General and administrative expenses increased by 13% to P 1.2 billion for the period mainly driven by higher professional fees, repairs & maintenance, depreciation and amortization, and taxes and licenses.
- The company booked other operating income of P3.6 million in 2025 mainly from forex gains and interest income from short term deposits from banks.
- Finance costs increased by 40% year-on-year to ₱1.4 billion, largely due to higher debt levels and the maturity of a ₱3 billion bond with a lower interest rate.
- Income tax expense decreased by 15% to P360 million in 2025.

Segment Operations

Food Ingredients

- The unprecedented surge in commodity prices weighed on the Food Ingredients segment, which recorded a 61% YoY decline in earnings for the year. Nonetheless, the segment’s underlying strength remains evident, with High Margin Specialty Products (HMSP) volumes growing 13% YoY.
- While the company generally passes on input cost movements to customers, the rapid increase in coconut oil prices led to a temporary margin contraction due to a typical lag of 30–45 days before price adjustments. As coconut oil prices begin to normalize, coupled with pricing adjustments and ongoing portfolio optimization—rationalizing commodity exposure while increasing focus on HMSP—the company expects a recovery in profitability and margins.

Oleochemicals and Specialty Oleochemicals

- Chemrez delivered strong results in FY25, with volumes increasing by 24% year-on-year and net income rising 96% year-on-year. Growth was supported by sustained global demand for coconut oil-derived products, as well as the implementation of the higher mandated biodiesel blend from 2% to 3% effective October 1, 2024.
- A proposed measure seeking the temporary suspension of the biodiesel blending mandate is currently under deliberation in Congress. The bill would allow the President to suspend the local sourcing requirement for biofuel blending under the Biofuels Act of 2006 for up to one year during periods of abnormal fuel price movements. The company does not expect any material impact from this development.
- Based on prevailing market conditions, the price differential between biodiesel-blended diesel and pure diesel remains well below the five percent (5%) threshold indicated in the proposed legislation. As such, the company does not expect any material impact under current market conditions. Chemrez also has the flexibility to redirect production toward higher-value coconut-based oleochemical exports should domestic biodiesel demand temporarily soften.
- Looking ahead, Chemrez remains optimistic about its medium-term outlook, particularly in the export market. The company continues to pursue new market opportunities and product applications to expand its portfolio and enhance its technical capabilities. With the Batangas plant now fully operational, Chemrez is well-positioned to serve a broader international customer base and deliver higher value-added, sustainable solutions.

Specialty Plastics

- The Specialty Plastics division continued to go from strength to strength, delivering 9% year-on-year earnings growth in FY25, following a robust 32% increase in FY24. Successful new product developments—built on decades of R&D—continued to drive margins higher, reaching record levels in 2025. The segment remains well-positioned for continued growth, supported by ongoing investments in research and development and the company's focus on delivering innovative and sustainable plastic solutions aligned with evolving customer needs.

Consumer Products ODM

- The Consumer Products ODM segment posted a strong recovery, with earnings up 80% year-on-year as Batangas operations continued to ramp up. Exports have likewise become a key growth driver, now contributing 16% of total sales from virtually zero six years ago. With continued operational ramp-up and a broader market base, the segment is well-positioned for sustained growth.

- Cash at the end of 2025 stood at P3.39 billion, up 20% from the end-2024 level.
- Excluding the impact of VAT in the account balances, cash conversion cycle stood at 110 days with Accounts Receivable days, Inventory days, and Accounts Payable days at 45, 74, and 9 respectively.
- Prepayments and other current assets were higher by 31% at P7.8 billion.
- Net debt to equity ratio in 2025 stood at 96%. Interest cover remains comfortable at 3x. Total borrowings as of end-2025 stood at P25.3 billion.
- Retained earnings increased by 10% in 2025 to P12.1 billion mainly as a result of net income for the year. Total dividends paid amounted to Php1.5 billion which translated to a 65% payout ratio based on previous year's net income.
- Total equity increased by 5% to P35.0 billion on the back of higher retained earnings.
- The unprecedented surge in coconut oil prices—a key raw material for the company—drove higher working capital requirements in 2025, resulting in a negative free cash flow of P281 million for the year.
 - Net cash used by operating activities amounted to P568 million.

- Net cash used in investing activities amounted to P847 million which was mainly spent on acquisition of property and equipment
- Net cash generated by financing activities amounted to P829 million which was largely from new borrowings.

FY2024 versus FY2023

Results of Operations

- Reported net income available to common shareholders increased by 2% to P2.34 billion in 2024 from P2.3 billion in 2023, or earnings per share of P0.33 versus 2023's P0.32.
- Consolidated revenues of P40.7 billion in 2024 were 21% higher than P33.5 billion in 2023. The increase in revenue was mainly due to higher sales volume.
- Gross profit for 2024 increased by 9% to P6.3 billion from P5.7 billion in 2023, mainly due to higher sales volume for the year.
- Selling and marketing expenses increased by 43% to P1.6 billion in 2024 as the company incurred additional operating and marketing expenses related to the commercial operations of its new plant in Batangas.
- General and administrative expenses increased by 2% to P 1.1 billion in 2024 mainly driven by higher professional fees, contracted services, and taxes and licenses.
- The company booked other operating income of P95 million in 2024 mainly from forex gains and interest income from short term deposits from banks.
- Finance cost increased in 2024 (compared to previous year's) by 58% y-o-y to P971 million largely due to higher debt levels and interest rates.
- Income tax expense decreased in 2024 (compared to previous year's) by 41% to P424 million in 2024.

Segment Operations

Food Ingredients

- The food ingredients division delivered solid volume growth of 33% in FY24. This stellar volume growth drove profitability despite the incremental costs associated with the newly commissioned lines in Batangas. The food ingredients division ended the year with a 14% YoY earnings growth. For 2025, the company sees continued growth especially with the boost coming from election-related spending benefitting the consumer industry in general.
- With its global marketing initiatives and active participation in various world trade shows and conferences, the company has had several successes in gaining new export customers to date. As the new plant ramps up operations, coupled with the improving macroeconomic backdrop and an aggressive export thrust, management is optimistic on the long-term growth potential of this segment.

Oleochemicals and Specialty Oleochemicals

- Things have finally started to improve for Chemrez with total volume up 13% YoY. Despite the incremental expenses coming from the Batangas plant, Chemrez managed to book a 7% YoY earnings growth for 2024.
- Chemrez sees a continued recovery into 2025 given a more favorable regulatory environment for biodiesel, with the DOE indicating implementation of a biodiesel blend increase within the year. On the higher margin specialties and export side, Chemrez continues to expand its footprint globally especially with the new capacity and capabilities that the Batangas plant offers.

Specialty Plastics

- The Specialty Plastics division delivered strong results in FY24 with earnings growing by 17% YoY. Total volume for the period was up by 7% YoY while margins were higher by 1.9 ppts YoY. With its strong performance, the plastics division has overtaken both the food ingredients division and Chemrez in terms of net income contribution for the year.
- Improvements in the global auto industry translated to higher demand for engineered polymers for auto wire harness application, which the company manufactures under this division. In addition, there were successful market share grabs during the period, as the company continues to demonstrate its reliability as a supplier and as it invests in resources to further develop customer relationships.
- In the long run, the company anticipates sustained growth in this segment, driven by its groundbreaking research and development efforts, particularly in enhancing the sustainability of plastics.

Consumer Products ODM

- Following a strong performance in FY23, the Consumer Products ODM segment faced challenges in FY24, with earnings plummeting 51% YoY due to the lingering effects of high inflation and incremental expenses from the Batangas plant. The weakness in this division largely mirrors the cautiousness in the domestic consumer market, as 93% of the segment's sales are concentrated locally. Looking ahead, the company anticipates a rebound as inflation eases and incomes gradually align with higher price levels. Additionally, exports are emerging as a fresh growth driver, now accounting for 7% of total sales—up from nearly zero six years ago—with management expecting this share to steadily increase over the long term.

- Retained earnings increased by 8% in 2024 to P11.1 billion mainly as a result of net income for the year. Total dividends paid amounted to Php1.5 billion which translated to a 65% payout ratio based on previous year's net income.
- Total equity increased by 4% to P21.7 billion on the back of higher retained earnings.
- As the company moves past peak capex with the completion of its Batangas plant, the company's free cash flows (FCF) remained positive at P825 million in FY24.

- Net cash generated by operating activities stood at P1.9 billion.
- Net cash used in investing activities amounted to P1 billion which was mainly spent on acquisition of property and equipment
- Net cash used in financing activities amounted to P849 million which mainly went to dividend and interest payments.

D&L's Plan of Operation for 2026

The Batangas plant turned profitable in 2024, ahead of the original two-year target. In 2025, it sustained consistent profitability and became a stable contributor to earnings, validating the scale, efficiency, and strategic value of the investment.

2025 was marked by an unprecedented increase in coconut oil prices, a key raw material. Despite this volatility, the Company managed to grow earnings by 11%, reflecting the underlying strength of its business.

Management remains focused on increasing Batangas utilization while advancing its medium-term objectives of expanding higher-margin businesses and growing exports to 50% of revenues.

For 2026 and beyond, the Company will continue to prioritize R&D to drive innovation across its portfolio. By deepening its technical capabilities and expanding its pipeline of differentiated products, D&L aims to strengthen its competitive position, enhance margin resilience, and deliver sustainable long-term growth across its core business segments.

Item 7. Financial Statements

The Financial Statements of the Company are incorporated herein by reference and attached as an integral part of this SEC Form-17A.

Item 8. Information on Independent Public Accountant and Other Related Matters

1. Independent Public Accountant

(a) Audit and Audit-Related Fees

The Company's independent public accountant is the accounting firm of Isla Lipana & Co. The Company's Audit Committee recommended for approval of the Board the appointment of external auditor for the ensuing year. The stockholders then approved and ratified the appointment of external auditor at the annual stockholder's meeting held on June 2, 2025. Isla Lipana has not expressed any intention to resign as the Company's principal auditor nor has it indicated any hesitance to accept re-election after the completion of their last audit.

Pursuant to the General Requirements of the SRC Rule 68, paragraph 3 (Qualifications and Reports of Independent Auditors), the Company has engaged Isla Lipana & Co. as external auditor. Mr. Carlos Federico C. de Guzman is the engagement partner in charge of the Company's financial statements for 2023 to 2025. Mr. Roderick M. Danao was the audit engagement partner-in-charge for the Company's financial statement audit from 2018 up to 2022.

The aggregate fees billed and payable for each of the last three (3) fiscal years for professional services that are normally rendered by Isla Lipana & Co for the audit of the company's Annual Financial Statements are the following:

Year	Audit Fees
2023	P5,870,000
2024	P6,475,000
2025	P6,665,000

There are no other assurance and related services by Isla Lipana & Co. that are related to the performance of the audit or review of the Company's Financial Statements.

(b) All Other Fees

Isla Lipana & Co was engaged to provide the comfort letter and arrangement letter covering years 2017 to 2020 required for the Company's Bond Issuance last 2021, for which fees in the amount of P1,528,000 were paid to Isla Lipana & Co. There are no aggregate fees billed in each of the last three (3) fiscal years for products and services provided by Isla Lipana & Co., other than this and the services reported under item (a) above.

(c) Audit Committee's Approval Policies and Procedures

The Audit Committee is entirely composed of independent directors:

Mrs. Corazon S. de la Paz-Bernardo, as Chairman (Independent Director), Atty. Mercedita S. Nollo do (Independent Director), Dr. Karl Kendrick T. Chua (Independent Director) and Dr. Lydia R. Balatbat-Echaz (Independent Director).

The Audit Committee meets on a regular basis to:

1. Recommend the approval of the Internal Audit Charter (IA Charter), which formally defines the role of Internal Audit and the audit plan as well as oversee the implementation of the IA Charter;
2. Through the Internal Audit (IA) Department, monitor and evaluate the adequacy and effectiveness of the Company's internal control system, integrity of financial reporting, and security of physical and information assets. Well-designed internal control procedures and processes that will provide a system of checks and balances should be in place in order to (a) safeguard the Company's resources and ensure their effective utilization, (b) prevent occurrence of fraud and other irregularities, (c) protect the accuracy and reliability of the company's financial data, and (d) ensure compliance with applicable laws and regulations;
3. Oversee the IA Department, and recommend the appointment and removal of an IA head or Chief Audit Executive (CAE) as well as his qualifications, and grounds for appointment and removal;
4. Approve the terms and conditions for outsourcing internal audit services;
5. Establish and identify the reporting line of the Internal Auditor, who shall directly report to the Audit Committee, to enable him to properly fulfill his duties and responsibilities;

6. Monitor Management's responsiveness to the Internal Auditor's findings and recommendations;
7. Prior to the commencement of the audit, discuss with the External Auditor the nature, scope and expenses of the audit, and ensure the proper coordination if more than one audit firm is involved in the activity to secure proper coverage and minimize duplication of efforts;
8. Evaluate and determine the non-audit work, if any, of the External Auditor, and periodically review the non-audit fees paid to the External Auditor in relation to the total fees paid to him and to the Company's overall consultancy expenses, provided the Audit Committee shall disallow any non-audit work that will conflict with his duties as an External Auditor or may pose a threat to his independence; provided further, that the non-audit work, if allowed, should be disclosed in the Company's Annual Report and Annual Corporate Governance Report;
9. Review and approve the Interim and Annual Financial Statements before their submission to the Board, with particular focus on the following matters:
 - a. Any change/s in accounting policies and practices
 - b. Areas where a significant amount of judgment has been exercised
 - c. Significant adjustments resulting from the audit
 - d. Going concern assumptions
 - e. Compliance with accounting standards
 - f. Compliance with tax, legal and regulatory requirements
10. Review the disposition of the recommendations in the External Auditor's management letter;
11. Perform oversight functions over the Company's Internal and External Auditors and ensure the independence of Internal and External Auditors, and that both auditors are given unrestricted access to all records, properties and personnel to enable them to perform their respective audit functions taking into consideration relevant Philippine professional and regulatory requirements;
12. Coordinate, monitor and facilitate compliance with laws, rules and regulations;
13. Recommend to the Board the appointment, reappointment, removal and fees of the External Auditor, duly accredited by SEC, who undertakes an independent audit of the Company, and provides an objective assurance on the manner by which the financial statements should be prepared and presented to the stockholders;
14. Assess the integrity and independence of external auditors and exercise effective oversight to review and monitor the external auditor's independence and objectivity and the effectiveness of the audit process, taking into consideration relevant Philippine professional and regulatory requirements; and;
15. Review and monitor the external auditor's suitability and effectiveness on an annual basis

**STATEMENT OF MANAGEMENT'S RESPONSIBILITY
FOR FINANCIAL STATEMENTS**

The management of D&L Industries, Inc. and Subsidiaries (the "Group") is responsible for the preparation and fair presentation of the consolidated financial statements including the schedules attached therein, as at December 31, 2025 and 2024 and for the years ended December 31, 2025, 2024 and 2023, in accordance with the prescribed financial reporting framework indicated therein, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is responsible for overseeing the Group's financial reporting process.

The Board of Directors reviews and approved the consolidated financial statements including the schedules attached therein, and submits the same to the stockholders or members.

Isla Lipana & Co, the independent auditor appointed by the stockholders, has audited the consolidated financial statements of the Group in accordance with Philippine Standards on Auditing, and in its report to the stockholders or members, has expressed its opinion on the fairness of presentation upon completion of such audit.

Independent Auditor's Report

To the Board of Directors and Shareholders of
D&L Industries, Inc.
No. 65 Industria Street
Bagumbayan, Quezon City

Our Opinion

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of D&L Industries, Inc. (the "Parent Company") and its subsidiaries (together the "Group") as at December 31, 2025 and 2024, and their consolidated financial performance and their consolidated cash flows for each of the three years in the period ended December 31, 2025 in accordance with Philippine Financial Reporting Standards (PFRS) Accounting Standards.

What we have audited

The Group's consolidated financial statements comprise:

- the consolidated statements of financial position as at December 31, 2025 and 2024;
- the consolidated statements of total comprehensive income for each of the three years in the period ended December 31, 2025;
- the consolidated statements of changes in equity for each of the three years in the period ended December 31, 2025;
- the consolidated statements of cash flows for each of the three years in the period ended December 31, 2025 and
- the notes to the consolidated financial statements, comprising material accounting policy information and other explanatory information.

Basis for Opinion

We conducted our audits in accordance with Philippine Standards on Auditing (PSAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Consolidated Financial Statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Group in accordance with the Code of Ethics for Professional Accountants in the Philippines (Code of Ethics), as applicable to audits of consolidated financial statements of public interest entities, together with the ethical requirements that are relevant to our audits of the consolidated financial statements of public interest entities in the Philippines. We have also fulfilled our other ethical responsibilities in accordance with these requirements and Code of Ethics.

Our Audit Approach

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the consolidated financial statements. In particular, we considered where management made subjective judgments; for example, in respect of significant accounting estimates that involved making assumptions and considering future events that are inherently uncertain. As in all our audits, we also addressed the risk of management override of internal controls, including among other matters, consideration of whether there was evidence of bias that represented a risk of material misstatement due to fraud.

We tailored the scope of our audit in order to perform sufficient work to enable us to provide an opinion on the consolidated financial statements as a whole, taking into account the structure of the Group, the accounting processes and controls, and the industry in which the Group operates.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matter identified in our audit is impairment of goodwill.

Key Audit Matter	How our audit addressed the key audit matter
<p>Impairment of goodwill</p> <p>Refer to Note 1.3 to the consolidated financial statements.</p> <p>As at December 31, 2025, the Group reported goodwill amounting to P3.4 billion in the consolidated statement of financial position. An annual impairment review is performed based on the requirements of Philippine Accounting Standards (PAS) 36, Impairment of Assets. Goodwill impairment testing was performed by management related to the oleochemicals, resins and powder coating segment which was assessed to be the lowest level of cash-generating unit (or CGU).</p> <p>Management's impairment testing over goodwill was significant to our audit because the assessment process is complex, and requires significant management estimate and judgment. The most significant assumptions used in management's impairment testing relate to the discount rate and terminal growth rate applied together with the assumptions supporting the underlying forecasted cash flows, in particular the revenue growth rate and cost ratio.</p>	<p>We addressed the matter by evaluating management's impairment testing, which is based on discounted cash flow models incorporating cash flow forecasts of the relevant business segment approved by the Board of Directors.</p> <p>We tested the key assumptions and methodologies used, in particular the CGU determination, discount rate, terminal growth rate, revenue growth rate and cost ratio. Specific procedures are discussed below:</p> <ul style="list-style-type: none"> • Reviewed management's basis for identifying the CGU where goodwill is allocated. • With the assistance of our valuation experts, we independently assessed the reasonableness of the discount rate derived from the Weighted Average Cost of Capital (WACC), including the underlying assumptions and inputs, by comparison with those of comparable companies and observable market data. We also assessed the reasonableness of terminal growth rate by benchmarking them against external economic, industry, and market data. • We evaluated the reasonableness of projected cash flows by comparing forecasted revenue growth and cost ratios to historical performance, and by assessing the consistency of the assumptions with management's expectations of future market conditions, product mix, and macroeconomic trends affecting demand. <p>In testing the discounted cash flow calculation, we also performed the following:</p> <ul style="list-style-type: none"> • Tested mathematical accuracy of the discounted cash flow calculation. • Tested the determination of the carrying amount of the CGU. • Performed sensitivity analysis of key assumptions, including the discount rate, terminal growth rate, revenue growth rate and cost ratio, to assess the extent to which reasonably possible changes in these assumptions could result in the carrying amount exceeding the recoverable amount of the CGU.

Other information

Management is responsible for the other information. The other information comprises the information included in the SEC Form 20-IS (Definitive Information Statement) and SEC Form 17-A, but does not include the consolidated financial statements and our auditor's report thereon. The SEC Form 20-IS (Definitive Information Statement) and SEC Form 17-A are expected to be made available to us after the date of this auditor's report.

Our opinion on the consolidated financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above when these become available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

When we read the other information identified above which have not yet been received, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with PFRS Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with PSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with PSA, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the Group as a basis for forming an opinion on the consolidated financial statements. We are responsible for the direction, supervision and review of the audit work performed for purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

Independent Auditor's Report
To the Board of Directors and Shareholders of
D&L Industries, Inc.
Page 7

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

We have audited in accordance with Philippine Standards on Auditing, the consolidated financial statements of D&L Industries, Inc. (the "Parent Company") and its subsidiaries (together, the "Group") as at December 31, 2025 and 2024 and for each of the three years in the period ended December 31, 2025, and have issued our report thereon dated April 1, 2026. Our audits were made for the purpose of forming an opinion on the basic consolidated financial statements taken as a whole. The Supplementary Schedule on Financial Soundness Indicators, including their definitions, formulas, calculation, and their appropriateness or usefulness to the intended users, are the responsibility of the Group's management. These financial soundness indicators are not measures of operating performance defined by Philippine Financial Reporting Standards (PFRS) Accounting Standards and may not be comparable to similarly titled measures presented by other companies. This schedule is presented for the purpose of complying with the Revised SRC Rule 68 issued by the Securities and Exchange Commission, and is not a required part of the basic consolidated financial statements prepared in accordance with PFRS Accounting Standards. The components of these financial soundness indicators have been traced to the Group's consolidated financial statements as at December 31, 2025 and 2024 and for each of the three years in the period ended December 31, 2025 and no material exceptions were noted.

Statement Required by Rule 68 Securities Regulation Code (SRC)

To the Board of Directors and Shareholders of
D&L Industries, Inc.
No. 65 Industria Street
Bagumbayan, Quezon City

We have audited the consolidated financial statements of D&L Industries, Inc. (the "Parent Company") and its subsidiaries (together, the "Group") as at December 31, 2025 and 2024 and for each of the three years in the period ended December 31, 2025, on which we have rendered the attached report dated April 1, 2026. The supplementary information shown in the Reconciliation of Parent Company's Retained Earnings Available for Dividend Declaration, Map Showing the Relationships between and among the Parent Company and its Ultimate Parent Company, Middle Parent, Subsidiaries or Co-Subsidiaries and Associates, and Schedules A, B, C, D, E, F, and G, as additional component required by Revised Rule 68 of the SRC, is presented for purposes of filing with the Securities and Exchange Commission and is not a required part of the basic consolidated financial statements. Such supplementary information is the responsibility of management and has been subjected to the auditing procedures applied in the audit of the basic consolidated financial statements. In our opinion, the supplementary information has been prepared in accordance with the Revised Rule 68 of the SRC.

(All amounts are shown in Philippine Peso, unless otherwise stated)

1 General information

1.1 Business information

D&L Industries, Inc. (the “Parent Company” or “D&L”) was registered with the Securities and Exchange Commission (SEC) on July 27, 1971 primarily to invest in, purchase or otherwise acquire and own, hold, use, mortgage, pledge, exchange, or otherwise dispose of personal property of any corporation. The Parent Company is also engaged to carry on and conduct its business through any subsidiary companies or managers, or to enter into working agreements with other corporations including providing its subsidiaries corporate support services.

On November 5, 2012 and November 16, 2012, the SEC and Philippine Stock Exchange (PSE), respectively, approved the Parent Company’s application for the initial public offering. The Parent Company attained its status of being a “public company” on December 12, 2012 when it listed its shares in the PSE. As a public company, it is covered by the Securities Regulation Code (SRC) Rule 68. There has been no follow-on offering after initial public offering.

On May 11, 2015, the Parent Company’s Board of Directors (BOD), through an amendment of the Parent Company’s Articles of Incorporation, added, as an additional secondary purpose, the business of establishing and operating an analytical laboratory and rendering chemical testing services. This amendment was approved and ratified by the Parent Company’s stockholders during the annual stockholders meeting on June 8, 2015. The SEC approved the amendment on July 24, 2015.

The Parent Company is a subsidiary of Jadel Holdings Co., Inc. (JHI). As at December 31, 2025, of the total shares outstanding, JHI holds 63.88% (2024 - 62.40%) and local individuals hold 10.61% (2024 - 10.43%). The remaining 25.51% (2023 - 27.17%) are publicly held.

The Parent Company is ultimately owned by Jadel II Trust, represented by BDO Unibank as Trustee, and beneficially owned by the Lao Family.

As at December 31, 2025, the Parent Company has 248 shareholders owning one hundred (100) or more shares each (2024 - 228).

The Parent Company’s registered office address which is also its principal place of business is at No. 65 Calle Industria, Bagumbayan, Quezon City. As at December 31, 2025, the Parent Company has 403 regular employees (2024 - 386).

The consolidated financial statements of the Group as at December 31, 2025 have been approved and authorized by the Parent Company’s BOD on March 24, 2026. There were no significant events that occurred from March 24, 2026 until April 1, 2026 requiring adjustment or disclosure in the consolidated financial statements.

1.2 Consolidation

1.3 Acquisition of controlling interest in CTI

On August 29, 2014, the Parent Company's BOD resolved to acquire all the outstanding shares of CTI not previously owned by the Parent Company for P6.00 per share through a public tender offer for a total acquisition cost of P5,078.5 million. On October 7, 2014 (the acquisition date), a total of 846,408,196 shares had been tendered, representing approximately 65% of the issued and outstanding shares of CTI. As a result, CTI became 99.7% owned by the Parent Company effective October 7, 2014.

The consideration given with respect to the acquisition is based on the fair market value of CTI's shares on the date of acquisition totaling P5,078.5 million net of acquisition-related costs amounting to P6.5 million which was charged to profit or loss in 2014. Goodwill amounting to P3,367 million was recognized from this acquisition.

1.3.1 Critical accounting estimate and judgment: Impairment tests for goodwill; key assumptions used for value-in-use (VIU) calculations

The Group reviews goodwill annually for impairment or whenever events or changes in circumstances indicate that the carrying amounts may not be recoverable. Goodwill is monitored by management at the level of oleochemicals, resin and powder coatings segment (lowest level of cash generating unit) following the business acquisition of CTI.

As at December 31, 2025 and 2024, the recoverable amount of oleochemicals, resin and powder coatings CGU (the "CGU") was determined based on VIU calculation (using Level 3 inputs) and require the use of assumptions. The calculations use cash flow projections over a five-year period.

The cash flow forecast reflects management's expectation of revenue growth, operating costs and margins based on past experience and outlook, consistent with internal measurements and monitoring.

Cash flows beyond the five-year period are extrapolated using the estimated terminal growth rate derived from the long-term domestic consumer price index forecast of 3.0%. The growth rates are consistent with externally derived data.

A weighted average cost of capital (WACC) is used in discounting the free cash flows projected. In developing the WACC, companies with a similar business model as the CGU were considered in calculating the industry beta and debt-to-equity ratio.

The following are the key assumptions used in the impairment testing for the years ended December 31:

	2025	2024	2023
Revenue growth rate	10%	10%	14.1%
Cost ratio	80.4%	80%	77.2%
WACC (or discount rate)	13%	13%	13%
Terminal growth rate	3.0%	3.0%	3.5%

Based on the above assessment, goodwill is not impaired as at December 31, 2025 and 2024 as the recoverable amount exceeds the carrying amount of the CGU included in the financial statements.

The Group's goodwill impairment review includes sensitivity analysis on changes in key assumptions used for VIU calculations to those assumptions that are highly sensitive such as revenue growth rate, terminal growth rate, cost ratio and WACC. The changes in recoverable amount of CGU based on reasonable possible shift in the following assumptions as of December 31 is as follows:

	2025			2024		
	Reasonable possible shift	In Php millions		Reasonable possible shift	In Php millions	
		+Impact on VIU	-Impact on VIU		+Impact on VIU	-Impact on VIU
Revenue growth rate	+/-2%	4,141	(2,965)	+/-2%	2,810	(2,632)
Cost ratio	+/-2%	(4,699)	4,699	+/-2%	(4,043)	4,043
Terminal growth rate	+/-0.50%	1,635	(1,463)	+/-0.50%	1,169	(1,046)
WACC	+/-1%	(3,685)	4,836	+/-1%	(2,979)	3,732

Based on the sensitivity analysis performed using market-driven changes, management concluded that no reasonable change in the assumptions would cause the carrying amount of the CGU to exceed its recoverable amount because the calculated headroom is significant.

2 Segment information

Operating segments are reported in a manner consistent with the internal reporting provided to the Chief Operating Decision Maker (CODM), which is represented by the members of the Management Committee (ManCom), in making collective operating decisions with regard to the business segments. The ManCom, which is responsible for allocating resources and assessing performance of the operating segments, is identified as the one that makes strategic decisions for the Group.

Primary reporting - business segments

The Group's operating businesses are organized and managed according to the nature of the products marketed. Each segment, representing a strategic business unit, offers different products and services to different markets.

The Group has organized its reporting structure based on the grouping of similar products and services resulting in the following business segments:

(i) Food ingredients

The Group, operating through its subsidiary OFI and DLPF, manufactures a line of industrial fats and oils, food ingredients, specialty fats and oils and culinary and other specialty food ingredients. The Group supplies food ingredients to leading food manufacturers and quick-service restaurant chains in the Philippines, and also produces food safety solutions such as cleaning and sanitation agents for various customers.

(ii) Colorants and plastics additives

The Group, operating through its subsidiaries FIC and DLPCI, manufactures a line of pigment blends, color and additive master batches and engineered polymers for a wide range of applications, for the Philippine and export markets. The Group's products add properties such as precise coloring, reduced friction or increased resistance to degradation for plastics used in consumer goods, appliances and outdoor furniture.

(iii) Oleochemicals, resins and powder coatings

The Group, operating through its subsidiary, CTI, and subsidiaries, CPSI, and NAC, manufactures Coconut Methyl Ester ("CME", also known as coco-biodiesel), other oleochemicals or chemicals derived from vegetable oils, resins such as polystyrene, acrylic emulsions and polyester; and a line of powder coatings.

(iv) Consumer Products Original Design Manufacturing (ODM)

The Group, operating through its subsidiary, API, manufactures aerosol cans and components, and provides contract aerosol filling and compounding services. The Group also manufactures a range of products, including insect control, industrial maintenance chemicals, and home and personal care products, among others.

(v) Management and administration

The Parent Company maintains significant operational control of its subsidiaries through a contractual "shared services" model (Note 18). The Parent Company also performs such management and administrative services for other related entities that are not consolidated in the Group.

The following table presents the segment information provided to the ManCom about the Group's business segments for the years ended December 31:

	12,397,486,733	9,989,041,690	7,158,645,930

There were no non-current assets located outside the Philippines as at each reporting period.

3 Cash and cash equivalents

Cash and cash equivalents as at December 31 consist of:

	2025	2024
Cash in banks	3,305,224,736	2,734,384,410
Cash on hand	82,400,545	97,303,980
Cash equivalents	6,535,032	6,239,701
	3,394,160,313	2,837,928,091

Cash in banks earn interest at the bank deposit rates of 0.05% to 0.625% per annum for the year ended December 31, 2025 (2024 - 0.50% to 0.625% per annum). Cash equivalents pertain to cash placements with a local bank with maturity of less than 3 months.

For the year ended December 31, 2025, the Group earned interest income from cash accounts amounting to P3,281,862 (2024 - P9,976,710; 2023 - P15,596,776) (Note 17).

4 Receivables, net

Receivables, net as at December 31 consist of:

	2025	2024
Trade receivables	9,104,901,044	8,221,503,860
Allowance for impairment of receivables	(131,339,613)	(168,826,389)
	8,973,561,431	8,052,677,471

Other receivables	5,761,980	1,332,812
	8,981,354,103	8,057,626,201

Trade receivables arose from sale of goods and services. These are unsecured and non-interest bearing with an average credit term ranging from 30 to 90 days.

Movements in the allowance for impairment of receivables for the years ended December 31 are as follows:

	Note	2025	2024	2023
Beginning of year		168,826,389	154,864,153	146,332,149

End of year		131,339,613	168,826,389	154,864,153

4.1 Critical accounting estimate and judgment: Recoverability of receivables

Provision for impairment of receivables is maintained at a level considered adequate to provide for uncollectible receivables. Provision for impairment is calculated using expected credit losses (ECLs). ECLs are unbiased probability-weighted estimates of credit losses which are determined by evaluating a range of possible outcomes and taking into account past events, current conditions and assessment of future economic conditions.

The Group used relevant historical information and loss experience to determine the probability of default of the receivables arising from sale of goods and services to third parties and incorporated forward-looking information. The Group also evaluates specific account of customers who were unable to meet their financial obligations. In these cases, management uses judgment and assessment based on the best available facts, supported by historical defaults and credit losses.

5 Inventories, net

Inventories, net as at December 31 consist of:

	2025	2024
At net realizable value		
Finished goods	2,689,861,611	2,609,464,640
Allowance for inventory obsolescence	(90,589,627)	(51,934,432)

	9,862,974,505	8,814,275,027
	12,462,246,489	11,371,805,235

The cost of inventories sold recognized in cost of sales for the year ended December 31, 2025 amounted to P42,875,956,685 (2024 - P29,385,072,306; 2023 - P23,999,847,523) (Note 14).

Movements in the allowance for inventory obsolescence for the years ended December 31 are as follows:

	Note	2025	2024	2023
Beginning of year		86,862,448	80,809,819	75,628,175
Provision	14	74,448,998	6,052,629	5,181,644
End of year		161,311,446	86,862,448	80,809,819

Reversal of allowance for inventory obsolescence was due to sale and usage of previously provided inventories.

5.1 Critical accounting estimate and judgment: Provision for inventory obsolescence

Allowance for inventory obsolescence is maintained at a level considered adequate to provide for potential loss on inventory items. The level of provision is based on past experience and other factors affecting the recoverability and obsolescence of inventory items. An evaluation of inventories, designed to identify potential charges to the provision, is performed on a continuous basis throughout the period. Management uses judgment based on the best available facts and circumstances, including but not limited to evaluation of individual inventory items' future recoverability and utilization. The amount and timing of recorded provision for inventory obsolescence for any period would therefore differ based on the judgments made. A change in provision for inventory obsolescence would impact the Group's recorded expenses and carrying value of inventories.

The carrying values of the inventories at the end of the reporting period and the amount and timing of recorded provision for any period could be materially affected by actual experience and changes in such judgments such as effect of product obsolescence, competition in the market and changes in prices of finished products and manufacturing costs.

Management believes that the allowance for inventory obsolescence as at each reporting period is adequate.

6 Prepayments and other current assets; Other non-current assets

Prepayments and other current assets

End of the year	13,409,786	22,540,197	22,540,197

Input VAT

The Group's total input VAT, net of output VAT as at December 31 consist of:

	2025	2024
Current portion		
Carry-over claimable against output VAT	3,960,940,357	2,928,047,779
Tax credit claim (a)	420,521,629	428,187,643
Deferred input VAT (b)	70,617,158	57,373,514
	4,452,079,144	3,413,608,936
Non-current portion - Carry-over claimable against output VAT	1,284,391,946	1,285,880,929
	5,736,471,090	4,699,489,865

(a) Tax credit claim

Tax credit claim pertains to excess input VAT from zero-rated sales claimed by the Group for refund.

(b) Deferred input VAT

Deferred input VAT pertains to input VAT paid on services which is claimable upon issuance of invoice and input VAT from purchase of capital goods which is subject to amortization.

Deposits to suppliers

Deposits to suppliers are payments made in advance for goods and services that have not yet been received or incurred. It will be derecognized when goods or services are received.

Prepaid taxes

Prepaid taxes as at December 31, 2025 and 2024 mainly pertain to actual tax credit certificates (TCC) issued by the Bureau of Internal Revenue (BIR) in favor of the Group relating to filed application claims to convert excess input VAT into TCC. The TCC may be applied to future income tax liabilities.

CWT

CWT pertains to taxes withheld from income payments made to the Group and are creditable against future income tax payable.

Other non-current assets

Other non-current assets as at December 31 consist of:

	2025	2024
Input VAT	1,284,391,946	1,285,880,929
Refundable deposits	430,835,302	424,584,746
CWT	347,303,118	305,691,458
Advances to contractors	298,159,481	227,893,716
Others	161,284,672	137,307,740
	<u>2,521,974,519</u>	<u>2,381,358,589</u>

As at December 31, 2025, the Group has reviewed the expected utilization of its input VAT and CWT, and accordingly classified input VAT and CWT amounting to P1,284,391,946 and P347,303,118, respectively, to non-current assets (2024 - P1,285,880,929 and P305,691,458, respectively).

Refundable deposits pertain to the security deposits covering the Group's lease of office space, warehouse and land (Note 9).

Advances to contractors are related to construction in progress. These are presented within investing activities in the statements of cash flow.

Others mainly relate to prepaid licenses and non-proprietary golf club shares.

6.1 Critical accounting judgment: Recoverability of input VAT

Provision for impairment of input VAT is maintained at a level considered adequate to provide for recoverable claims or refund from excess input VAT. An evaluation of the tax credit claims from input VAT designed to identify potential charges to the provision, is performed on a continuous basis throughout the period. Management uses judgment based on the best available facts and circumstances, including but not limited to the evaluation of the aggregate tax credit future utilization, completeness of supporting documents and actual refund experiences with similar claims. Changes in those judgments could have a significant effect on the net amount of input VAT and the timing of recorded provision for any period.

Management has assessed that the carrying amount of input VAT as at each reporting period is recoverable based on management forecasts, strong legal basis and compliant supporting documents.

6.2 Critical accounting judgment: Recoverability of CWT

The Group recognizes CWT to the extent that it is probable that future tax liabilities will be available against which tax credits can be utilized. Determining the realizability and classification of CWT requires the assessment of the availability and timing of future taxable profit expected to be generated from the operations.

Significant judgment is required in determining the realizability of CWT. CWT arise mainly from the Parent Company's management and support services to its affiliates. Management believes based on long term forecasts that the Parent Company would be able to generate sufficient taxable income and future tax liabilities against which the CWT can be fully applied.

Based on management's assessment and judgment, no allowance for unrecoverable CWT is necessary to be recognized as at each reporting period as there are no indications of impairment or changes in circumstances indicating that the CWT may not be fully recoverable.

7 Investments in equity securities at FVOCI

As at December 31, 2025, investments in equity securities at FVOCI pertains to investment in shares of stock of a listed company and proprietary golf club share amounted to P388,022,212 (2024 - P343,066,891).

Additions during the year include advance lease payments (Note 9).

8.1 Critical accounting estimate and judgment: Useful life of property, plant and equipment

The useful life of each of the Group's property, plant and equipment is estimated based on the period over which these assets are expected to be available for use. Such estimation is based on a collective assessment of internal technical evaluation and experience with similar assets. The estimated useful life of each asset is reviewed periodically and updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the asset. It is possible, however, that future results of operations could be materially affected by changes in the amounts and timing of recorded expenses brought about by changes in the factors mentioned above. A change in the estimated useful life of any property, plant and equipment would impact the recorded depreciation expense and carrying value of property, plant and equipment.

9 Leases

The Group leases various office space, warehouse, and equipment for its back office and manufacturing operations.

The lease agreements do not require any covenants other than the security deposits in the leased assets that are held by the lessor.

(i) Amounts recognized in the consolidated statements of financial position

Leased assets are presented as a separate line item in the statement of financial position. The statements of financial position show the following amounts relating to leases:

	2025	2024
<i>Right-of-use assets, net</i>	1,165,415,775	936,143,886

(ii) Amounts recognized in the consolidated statements of total comprehensive income

The consolidated statements of total comprehensive income show the following amounts relating to leases:

	2025	2024
Amortization of ROU	658,445,417	373,226,986
Interest expense (included in Finance costs)	64,577,701	22,698,159
Gain on lease modification	-	-
Expense relating to short-term leases (included in cost of sales and services and general and administrative expenses)	255,469,477	399,589,120
	978,492,595	795,514,265

The total cash outflows for leases for the year ended December 31, 2025 is P633,098,920 (2024 - P438,290,012).

(iii) Discount rate

Payments for leases of properties and equipment are discounted using the lessee's incremental borrowing rate, being the rate that the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic environment with similar terms, security and conditions.

(iv) Lease term

The lease term applied in the calculation of right-of-use assets and lease liabilities are based on the contractual agreements of the Group with the lessor. There were no extension options applied in the calculation.

9.1 Critical accounting judgment: Determining the lease term

In determining the lease term, management considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. Extension options (or periods after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated).

For leases of land, the Group considers the following factors as the most relevant:

- If any constructed property, plant and equipment are expected to have a significant remaining value, the Group is typically reasonably certain to extend (or not terminate).
- Otherwise, the Group considers other factors including historical lease durations and the costs and business disruption required to replace the leased asset.

The lease term is reassessed if an option is actually exercised (or not exercised) or the Group becomes obliged to exercise (or not exercise) it. The assessment of reasonable certainty is only revised if a significant event or a significant change in circumstances occurs, which affects this assessment, and that is within the control of the lessee.

10 Trade payables and other liabilities

Trade payables and other liabilities as at December 31 consist of:

	Note	2025	2024
Trade payables		2,676,889,758	3,661,185,113

19 Retirement plan

The Group maintains a non-contributory defined benefit retirement plan for the benefit of its regular employees. The normal retirement age is 60. Normal retirement benefit is equal to three-fourth month salary as of date of retirement multiplied by retiree's years of service. Three-fourth month salary is equivalent to 22.5 days basic salary, cash equivalent of 5-day vacation leaves, and one-twelfth (1/12) of the 13th month pay. Actuarial valuation is performed by an independent actuary on an annual basis. The latest actuarial valuation report was prepared as of December 31, 2025.

The Group has plan assets, a group-administered fund, under the D&L Group of Companies Employees' Retirement Plan (the "Group Retirement Plan") that share risks and returns between various entities under common control within JHI. Plan assets are handled by a trustee bank, governed by local regulations and practices and approved policies and procedures by the Board of Trustees.

Net defined benefit cost and contributions are allocated to the participating entities in the Group Retirement Plan on the basis of retirement benefit expense and obligation attributable to each of the participating entities.

	325,657,173	100%	372,525,731	100%

The defined benefit plan typically exposes the participating entities to a number of risks such as investment risk and interest rate risk.

Given the long-term nature of the retirement liability, the participating entities believe that the mix of debt and equity securities holdings of the plan is an appropriate element of the long-term strategy to manage the plan efficiently. Investments are well diversified, such that the failure of any single investment would not have a material impact on the overall level of assets. The largest proportion of assets is invested in equities which include highly rated stocks, although there are also investments in treasury bonds and notes, mutual fund, and unit investment trust funds. The management believes that equities offer the best returns over the long term with an acceptable level of risk.

As at December 31, 2025, listed stocks include shares of stocks of the Parent Company amounting to P52,222,825 representing 0.19% interest in the Parent Company (2024 - P82,607,013; 0.19% interest). The voting rights over these shares are exercised by the trustee bank.

The allocated share of the Group in the Retirement Plan as at December 31 is as follows:

	2025		2024	
	Amount	Percentage	Amount	Percentage
Listed stocks	140,222,351	43.64%	222,721,271	60.80%
Treasury bonds and notes	107,702,506	33.52%	112,236,240	30.64%
Unit investment trust funds	55,085,138	17.14%	19,004,216	5.19%

	321,342,276	100%	366,345,970	100%

The principal annual actuarial assumptions used as at December 31 were as follows:

	2025	2024
Discount rate	6.19%-6.31%	6.11%-6.13%
Future salary increase rate	5.00%	5.00%

As at December 31, 2025, the average life expectancy in years of experience of a pensioner retiring at age 60 is 17-30 years (2024 - 18-24 years). Assumptions regarding future mortality experience are set based on published statistics and experience.

As part of its funding policy, the Group follows the recommended contribution to the plan as determined by an independent actuary. The recommended contribution to the plan consists of the annual amortization of the excess fund plus the current service cost for the year. The expected contribution to retirement fund by December 31, 2025 is P70,327,412.

19.1 Critical accounting estimate: Retirement benefit obligation

The present value of the retirement benefit obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) for retirement benefit include the discount rate and future salary increases. Any changes in these assumptions will impact the carrying amount of retirement benefit obligation.

The Group determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the retirement benefit obligation. In determining the appropriate discount rate, the Group considers the interest rates of government bonds that are denominated in the currency in which the benefits will be paid and that have terms to maturity approximating the terms of the related retirement benefit obligation and related retirement benefit expense.

Other key assumptions for retirement benefit obligation are based in part on current market conditions.

The sensitivity of the defined benefit obligation as at December 31 to changes in the significant weighted principal assumptions follows:

	Impact on defined benefit obligation		
	Change in assumption	Increase in assumption	Decrease in assumption
<i>As at December 31, 2025</i>			
Discount rate	+/-0.50%	(26,015,119)	28,389,579
Future salary increase	+/-1.00%	57,006,041	(48,784,688)
<i>As at December 31, 2024</i>			
Discount rate	+/-0.50%	(20,848,049)	22,747,355
Future salary increase	+/-1.00%	45,579,362	(39,023,433)

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions, the same method has been applied as when calculating the retirement benefit obligation recognized within the consolidated statement of financial position.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous period.

Expected maturity analysis of undiscounted retirement benefits as at December 31 is as follows:

	Less than a year	1 to 5 years	5 to 10 years
2025	40,668,098	193,859,7117	358,410,811
2024	39,097,825	153,600,799	230,950,836

There are no other related party transactions with the retirement fund except for the contributions to, benefits paid and investment in shares in the Parent Company by the retirement fund.

Corporate income tax

In compliance with local tax law, the Group shall pay the greater of minimum corporate income tax (MCIT), which is 1% of gross income as defined under the law, and the normal income tax which is 25% of taxable income. Any excess of MCIT over the normal income tax shall be carried forward for the next three (3) consecutive taxable years immediately following the year such MCIT was paid.

The Tax Reform Act of 1997 (the Act) introduced NOLCO as a deduction from taxable income for the three consecutive years immediately following the year such loss was incurred.

NOLCO pertains to the net operating loss of the business, outside of the Company's PEZA-registered activities, for any taxable year which can be claimed as a deduction from taxable income for the next three (3) consecutive taxable years immediately following the year of such loss.

In 2020, pursuant to Section 4 (bbb) of Bayanihan II and as implemented under RR 25-2020, the net operating losses of a business or enterprise incurred for taxable years 2020 and 2021 can be carried over as a deduction from gross income for the next five (5) consecutive taxable years following the year of such loss.

Realization of the future tax benefit related to these DIT assets is dependent on the entity's ability to generate future taxable income during the periods the temporary differences reverse, and before NOLCO benefit prescribes.

PEZA registered activity

DLPCI

On October 26, 2007, the PEZA approved DLPCI's application for registration to manufacture specialty polymer and colours compound. Under this registration, such activity is entitled to a four-year income tax holiday (ITH) from the start of commercial operations in April 2008. On March 16, 2009, PEZA approved DLPCI's request for the adjustment of the start date of commercial operations to March 1, 2009. As a result, the ITH was extended until February 28, 2013. On September 18, 2012, PEZA approved the extension of DLPCI's ITH to February 28, 2014 on the basis of its Net Foreign Exchange Earnings. 21 Critical accounting estimates, assumptions and judgments

Estimates, assumptions and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The Group makes estimates, assumptions and judgments concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates, assumptions and judgments that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

21.1 Critical accounting estimates and assumptions

- 21.1.1 *Key assumptions used for value-in-use calculations (Note 1.3.1)*
- 21.1.2 *Recoverability of receivables (Note 4.1)*
- 21.1.3 *Provision for inventory obsolescence (Note 5.1)*
- 21.1.4 *Useful life of property, plant and equipment (Note 8.1)*
- 21.1.5 *Key assumptions used to calculate retirement benefit obligation (Note 19.1)*

21.2 Critical accounting judgments in applying the Group's accounting policies

- 21.2.1 *Impairment tests for goodwill (Note 1.3.1)*
- 21.2.2 *Recoverability of receivables (Note 4.1)*
- 21.2.3 *Provision for inventory obsolescence (Note 5.1)*
- 21.2.4 *Recoverability of input VAT (Note 6.1)*
- 21.2.5 *Recoverability of CWT (Note 6.2)*
- 21.2.6 *Determining the lease term (Note 9.1)*

22 Financial risk and capital management

22.1 Financial risk factors

The Group's activities expose it to a variety of financial risks and these activities involve the analysis, evaluation and management of some degree of risk or combination of risks. The Group's overall risk management program focuses on the unpredictability of financial markets, aims to achieve an appropriate balance between risk and return and seeks to minimize potential adverse effects on the Group's financial performance.

Risk management is carried out by the ManCom.

The most important types of risk the Group manages are: credit risk, market risk and liquidity risk. Market risk includes foreign currency exchange, price and interest risks.

22.2 Components of financial assets and liabilities by category

22.2.1 Financial assets

Details of the Group's financial assets as at December 31 are as follows:

	Notes	2025	2024
Financial assets at amortized cost			
Cash and cash equivalents	3	3,394,160,313	2,837,928,091
Receivables, gross	4	9,112,693,716	8,226,452,590
Due from related parties	18	133,801,505	158,571,168
Refundable deposits	6	430,835,302	424,584,746
Financial assets at FVPL		41,801,156	39,958,426
Financial assets at FVOCI		388,022,212	343,066,891
		13,501,314,204	12,030,561,912

Receivables are presented gross of allowance for impairment as at December 31, 2025 amounting to P131,339,613 (2024 - P168,826,389).

The other components of other current and non-current assets are considered non-financial assets which include deposits to suppliers, input VAT, creditable withholding taxes and prepayments.

The carrying amounts of financial asset at amortized cost approximate their fair values (Level 1) as the impact of discounting is not considered significant. Financial assets at FVPL and FVOCI are measured at quoted prices (Level 1). Investments in FVPL include investments in open-ended unit investment trust funds that are redeemable anytime and reports daily net asset value.

22.2.2 Financial liabilities

Details of the Group's financial liabilities, categorized as other financial liabilities at amortized cost at December 31 are as follows:

	Notes	2025	2024
Trade payables and other liabilities	10	3,323,771,162	4,354,173,545
Due to related parties	18	76,548,742	39,417,257
Lease liabilities	9	1,141,018,684	821,822,597
Bonds payable	11	1,996,323,946	1,990,780,368
Borrowings	11	23,299,487,284	19,099,487,284
		29,837,149,818	26,305,681,051

Trade payables and other liabilities exclude amounts due to regulatory agencies and advances from customers as at December 31, 2025 amounting to P89,224,329 and P40,652 (2024 - P121,250,723 and P69,329), respectively.

The carrying amounts of financial liabilities at amortized cost approximate their fair values (Level 2) due to their short-term nature and/or the impact of discounting is not considered significant. The estimated fair value (Level 2) of the lease liabilities and bonds payable as it approximates its carrying amount as it carries market interest rate.

22.3 Credit risk

The Group's exposure to credit risk arises primarily from financial assets at amortized cost and financial assets at FVPL.

The Group has prudent credit policies to ensure that sales of its products are made to customers with good credit history. The senior management team, product group heads and the respective sales team perform credit evaluation and monthly review of outstanding receivables as part of the regular performance assessment process. All significant receivables from key customers are monitored for collectability and actual settlement performance, and specific action plans are required for any material overdue amounts from all categories of customers.

The Group's financial assets at December 31 that are subject to the expected credit loss model are as follows:

	2025	2024	Basis for recognition of ECL
Financial assets at amortized cost			
Cash and cash equivalents	3,311,759,768	2,740,624,111	12-month ECL
Trade and other receivables	9,104,901,044	8,221,503,860	Lifetime ECL
Due from related parties	133,801,505	158,571,168	12-month ECL
Refundable deposits	430,835,302	424,584,746	12-month ECL
Financial assets at FVPL	41,801,156	39,958,426	Marked to market
	13,023,098,775	11,579,900,115	

Cash and cash equivalents exclude cash on hand as at December 31, 2025 amounting to P82,400,545 (2024 - P97,303,980) which is not subject to credit risk.

The maximum exposure to credit risk at the reporting date is the carrying value of financial assets summarized above.

None of the financial assets that are fully performing has been renegotiated as at December 31, 2025 and 2024.

The Group does not hold any collateral as security to the above financial assets.

Cash in bank

Credit risk exposure arising from cash in bank arises from default of the counter party, with a maximum exposure equal to the fair value of financial asset. To minimize credit risk exposure, the Group deposits its cash in banks with good credit rating.

Cash deposited in these banks as at December 31 are as follows:

	2025	2024
Universal banks	3,305,224,736	2,734,384,410
Thrift banks	-	-
	3,305,224,736	2,734,384,410

While cash in bank are also subject to requirements of PFRS 9, expected credit loss is considered not significant. The Group does not hold any collateral as security to the above financial assets.

Due from related parties

Due from related parties pertain to amounts receivable for sale of inventories and services to related parties. These are non-interest bearing and are collectible generally within 30 to 60 days after transaction date. Due from related parties are fully recoverable. Management does not foresee significant credit risk on the outstanding balances of due from related parties as these are transacted with related parties with strong financial and liquidity position.

Trade and other receivables

(i) Trade receivables

The Group applies the PFRS 9 simplified approach to measuring expected credit losses which used a lifetime expected loss allowance for trade receivables arising from sale of goods and services to third parties. To measure the expected credit losses, receivables have been grouped based on shared credit risk characteristics and the historical collection cycle.

The expected loss rates are based on the payment profiles of counterparties over a period of 36 months before January 1, 2024 and the corresponding historical credit losses experienced within this period.

The historical loss rates are adjusted to reflect current and forward-looking information on macroeconomic factors affecting the ability of the customers to settle the receivables.

The Group has identified the Gross Domestic Product (GDP) and the inflation rates to be the relevant factors, and accordingly adjusts the historical loss rates based on expected changes in these factors that are assessed to be directly proportional.

On that basis, the loss allowance as at December 31 was determined as follows:

2025	Low risk	Moderate risk	Impaired	Total
Expected loss rate	0.40%	1.97%	6.58%	1.44%
Gross carrying amount - trade receivables	5,888,781,947	2,246,738,827	969,380,270	9,104,901,044
Loss allowance	(23,309,007)	(44,261,680)	(63,768,926)	(131,339,613)
Net receivables	5,865,472,940	2,202,477,147	905,611,344	8,973,561,431

2024	Low risk	Moderate risk	Impaired	Total
Expected loss rate	1.57%	7.54%	20.86%	2.05%
Gross carrying amount - trade receivables	7,625,704,392	563,908,567	31,890,901	8,221,503,860
Loss allowance	(119,672,080)	(42,501,351)	(6,652,958)	(168,826,389)
Net receivables	7,506,032,312	521,407,216	25,237,943	8,052,677,471

In assessing credit quality, the Company considers various factors such as Company's length of business with the customer, age of outstanding invoices and historical defaults. The Company's risk categorization is as follows:

Low risk - includes customers that have long history of credit quality based on the Company's experience, minimal to zero historical defaults and minimal invoices that exceed due dates.

Moderate risk - includes customers that are new or have no established track record, have certain history of past due and defaults.

Impaired - these are specifically identified customers that have been identified by management to be at high risk of uncollectability due to circumstances such as bankruptcy, substantial default and other factors.

(ii) Other receivables

Other receivables as at December 31, 2025 include loans to officers and employees amounting to P2,030,692 (2024 - P3,615,918). To address credit risk, these advances are subject to liquidation and/or collectible through salary deduction. Other receivables also include receivables from third parties to which the Group limits its exposure to credit risk by transacting only with counterparties that have appropriate and acceptable credit history. Advances to officers and employees and other receivables are considered to be fully recoverable and hence expected credit loss is considered insignificant.

Refundable deposits

This account pertains to security deposits on properties leased by the Group. Security deposits are generally refundable at the end of the lease term. Management does not expect significant credit risk on these deposits.

Financial assets measured at FVPL

The Group's investments in debt instrument are considered to have low credit risk. Management considers 'low credit risk' for unit investment trust funds, as they are managed by universal banks with good credit rating.

Market risk

22.4.1 Foreign currency exchange risk

The Group's material foreign currency denominated monetary assets and liabilities as at December 31 consist of:

	Currency	2025			2024		
		Amount in foreign currency	Rate	Peso equivalent	Amount in foreign currency	Rate	Peso Equivalent
Cash	USD	5,840,741	58.79	343,377,163	13,834,168	57.85	800,306,619
	EUR	610,221	69.25	42,257,804	667,371	36.08	24,078,746
	AUD	357	39.38	14,059	-	-	-
				385,649,026			824,385,365
Receivables	USD	17,736,500	58.79	1,042,728,835	17,759,750	57.85	1,027,401,538
	USD	(7,416,633)	58.79	(436,023,854)	(4,946,656)	57.85	(286,164,050)
Trade payables and other liabilities	EUR	(134,275)	69.25	(9,298,543)	(106,888)	36.08	(3,856,519)
	SGD	(15,810)	45.82	(724,414)	(24,974)	42.69	(1,066,140)
	JPY	(6,627,430)	0.38	(2,518,423)	-	-	-
	AUD	(183,500)	39.38	(7,226,230)	-	-	-
				(455,791,464)			(291,086,709)
				972,586,397			1,560,700,194

Foreign exchange gain (loss), net for the years ended December 31 consist of:

	2025	2024	2023
Realized foreign exchange gain (loss)	5,207,329	53,099,411	(7,889,906)
Unrealized foreign exchange gain (loss)	5,393,024	12,731,373	(7,756,855)
Foreign exchange gain (loss), net	10,600,353	65,830,784	(15,646,761)

The Group does not enter into derivative financial instruments to manage risks. Moreover, exposure to foreign currency risks is not yet considered to be material as foreign currency denominated trade receivables, partly offset by trade payables for imported raw materials, are generally short term in nature (less than 60 days terms). Also, the Group maintains sufficient cash in foreign currency to cover its maturing obligations.

A market driven change in foreign currency exchange rate, arising from US Dollar denominated assets (liabilities), as at December 31 would lead to immaterial pre-tax profit and equity movements.

22.4.2 Price risk

As at December 31, 2025, the Group is exposed to price risk in relation to its investments in debt and equity financial assets amounting to P41,801,156 and P388,022,212, respectively (2024 - P39,958,426 and P343,066,891). Components of debt and equity financial assets would increase or decrease as a result of gains or losses on these financial assets measured at fair value at the end of each reporting period. Management monitors such financial assets based on the net asset value of the debt instruments (unit investment trust funds) current market price of the shares. These financial assets are managed on an individual basis, and all buy and sell decisions are approved by the ManCom.

At each reporting period, the impact of a market driven change in fair value of the debt and equity investments, with all other variables held constant, would have been immaterial.

22.4.3 Cash flow and fair value interest rate risk

Cash flow interest rate risk is the risk that the future cash flows of a financial assets and liabilities will fluctuate because of changes in market interest rates. Fair value interest rate risk is the risk that the value of a financial assets and liabilities will fluctuate because of changes in market interest rates.

Cash flow interest rate risk

The Group's exposure to cash flow interest rate risk pertains to short-term borrowings where the related interests are repriced at periodic intervals based on the prevailing lending rate, in accordance with the terms of the agreement. The Group's practice is to manage its interest cost by reference to current market rates in borrowings. The Group's exposure arising from short term borrowing is not considered material.

The Group's fixed rate borrowings are measured at amortized cost. They are therefore not subject to cash flow interest rate risk as defined in PFRS 7, since neither the carrying amount nor the future cash flows will fluctuate because of a change in market interest rates.

Fair value interest rate risk

Changes in the market interest rates of the Group's financial liabilities with fixed interest rates only affect income if these are measured at their fair value. As such, the Group's financial liabilities with fixed interest rates that are measured at amortized cost are not subject to fair value interest rate risk as defined in PFRS 7.

22.4 Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash, the availability of funding through an adequate amount of credit facilities and the ability to close out market positions. Due to the dynamic nature of the underlying businesses, the Group aims to maintain flexibility by keeping credit lines available.

On a regular basis, management monitors forecasts of the Group's liquidity reserve on the basis of expected cash flows. The Group places cash in excess of immediate requirements in banks.

The table below summarizes the maturity profile of the Group's non-derivative financial liabilities based on contractual undiscounted payments:

	Due and demandable	Less than 3 months	Between 3 to 6 months	Between 7 to 12 months	Over 12 months	Total

	3,951,913,832	17,916,884	869,142,540	265,970,325	3,719,926,416	26,573,869,997

At December 31, 2025, borrowings, bond payable and lease liabilities include undiscounted cash flows on interest payable until its maturity.

The amounts disclosed in the table are the contractual undiscounted cash flows. Balances equal their carrying balances, as the impact of discounting is not significant.

The Group believes that cash generated from its operating activities and current assets are sufficient to meet maturing obligations required to operate the business. The Group would also be able to meet unexpected cash outflows by accessing additional funding sources from local banks.

The Group expects to settle the above financial obligations in accordance with their maturity date. However, the Group may consider to roll-over short-term loans based on working capital requirements.

22.5 Capital management

The Group's objective when managing capital is to generate the maximum possible returns for its shareholders while taking on a manageable degree of risk ensuring that the Group will continue to expand business and manufacturing facilities.

In order to maintain or adjust the capital structure, the Group reviews its capital structure from time to time to assess the proper financing mix necessary to grow and sustain its operations. As a matter of policy, capital expenditures have been financed from internally-generated cash flow, except for the Batangas plant expansion which has been funded partly by proceeds from bond offering, while working capital requirements will be augmented by short-term bank borrowings from time to time.

Earnings in excess of dividend distribution to shareholders have been continuously redeployed and reinvested in the growth of the Group's business. Each instance of expansion of manufacturing capacity and entry into new products and markets undergo a thorough evaluation process to ensure that such investments and marketing programs are in consonance with the Group's core competencies and would be enhancing shareholder value in the long run.

As part of the reforms of the PSE to expand capital market and improve transparency among listed firms, PSE required a minimum percentage of ten percent (10%) of the listed companies' issued and outstanding shares, exclusive of any treasury shares, to be held by the public. On May 31, 2017, the SEC issued a Memorandum Circular to increase the minimum percentage requirement to at least fifteen percent (15%) on or before end of 2018 and then to at least twenty percent (20%) on or before end of 2020. The Parent Company is compliant with respect to this requirement as at each reporting period.

As at December 31, 2025 and 2024, total capital is equal to total equity (excluding any reserves) as shown in the consolidated statements of financial position.

	2025	2024
Total equity	22,869,204,365	21,789,623,234
Reserves	(337,716,804)	(326,291,291)

There are no changes to the Group's capital management policies as at each reporting period.

23 Summary of material accounting policies

The principal accounting policies adopted in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

23.1 Basis of preparation

These consolidated financial statements of the Group have been prepared in accordance with PFRS Accounting Standards. PFRS Accounting Standards comprise the following authoritative literature:

- PFRS Accounting Standards,
- Philippine Accounting Standards (PAS) Accounting Standards, and
- Interpretations issued by the International Financial Reporting Interpretations Committee (IFRIC), Philippine Interpretations Committee (PIC), and Standing Interpretations Committee (SIC) as approved by the Financial and Sustainability Reporting Standards Council (FSRSC) and the Board of Accountancy, and adopted by the Securities and Exchange Commission (SEC).

These consolidated financial statements have been prepared under the historical cost convention, as modified by revaluation of financial assets at FVPL and FVOCI, and retirement benefit plan where plan assets are measured at fair value.

The preparation of consolidated financial statements in conformity with PFRS Accounting Standards requires the use of certain critical accounting estimates. It also requires management to exercise judgment in the process of applying the Group's accounting policies. The areas involving higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 21.

23.1.1 Changes in accounting policy and disclosures

(a) New standards, amendments, and interpretations to existing standards adopted by the Company

There are no standards, amendments and interpretations which are effective for the financial year beginning January 1, 2025 that are relevant to and have a material impact on the Group's financial statements.

(b) New standards, amendments and interpretations not yet adopted

Certain new accounting standards and amendments to accounting standards have been published that are not mandatory for December 31, 2025 reporting periods and have not been early adopted by the Group. The Group's assessment of the impact of these new standards and amendments is set out below:

(a) Amendments to the Classification and Measurement of Financial Instruments - Amendments to IFRS 9 and IFRS 7 (effective for annual periods beginning on or after January 1, 2026)

On May 30, 2024, the IASB issued targeted amendments to PFRS 9 and PFRS 7 to respond to recent questions arising in practice, and to include new requirements not only for financial institutions but also for corporate entities.

These amendments:

- clarify the date of recognition and derecognition of some financial assets and liabilities, with a new exception for some financial liabilities settled through an electronic cash transfer system;
- clarify and add further guidance for assessing whether a financial asset meets the solely payments of principal and interest (SPPI) criterion;
- add new disclosures for certain instruments with contractual terms that can change cash flows (such as some financial instruments with features linked to the achievement of environment, social and governance targets); and
- update the disclosures for equity instruments designated at fair value through other comprehensive income (FVOCI).

The Group does not expect these amendments to have a material impact on its operations or consolidated financial statements.

(b) PFRS 18 Presentation and Disclosure in Financial Statements (effective for annual periods beginning on or after January 1, 2027)

PFRS 18 will replace PAS 1 Presentation of financial statements, introducing new requirements that will help to achieve comparability of the financial performance of similar entities and provide more relevant information and transparency to users. Even though PFRS 18 will not impact the recognition or measurement of items in the financial statements, its impacts on presentation and disclosure are expected to be pervasive, in particular those related to the statement of financial performance and providing management-defined performance measures within the financial statements.

Management is currently assessing the detailed implications of applying the new standard on the Group's consolidated financial statements.

The Group will apply the new standard from its mandatory effective date of January 1, 2027. Retrospective application is required, and so the comparative information for the financial year ending December 31, 2026 will be restated in accordance with PFRS 18.

23.2 Financial assets

23.2.1 Classification and presentation

Classification

The Group classifies its financial assets in the following measurement categories:

- (a) those to be measured subsequently at fair value (either through OCI or through profit or loss), and;
- (b) those to be measured at amortized cost.

The classification depends on the Group business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or other comprehensive income. For investments in debt instruments, this will depend on the business model in which the investment is held. For investments in equity instruments that are not held for trading, this will depend on whether the Group has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income, otherwise it will be recognized at fair value through profit or loss.

The Group shall reclassify financial assets when and only when its business model for managing those assets changes.

The Group's financial assets measured at fair value through profit and loss includes unit investment trust fund (UITF) while financial assets measured at fair value through other comprehensive income includes investments in equity securities.

The Group's financial assets at amortized cost category include cash and cash equivalents, trade receivables, due from related parties and refundable deposits. The Group's financial assets are detailed in Note 22.2.

23.2.2 Recognition and derecognition

Regular way purchases and sales of financial assets are recognized on trade-date, the date on which the Group commits to purchase or sell the asset. Financial assets are derecognized when the rights to receive cash flows from the financial assets have expired or have been transferred and the Group has transferred substantially all the risks and rewards of ownership.

23.2.3 Measurement

At initial recognition, the Group measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss ("FVTPL"), transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVTPL are expensed in profit or loss.

(a) Debt instruments - subsequent measurement

Subsequent measurement of debt instruments depends on the Group's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the Group classifies its debt instruments:

- Amortized cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortized cost. Interest income from these financial assets is included in other income (expenses), net, using the effective interest rate method. Any gain or loss arising on derecognition is recognized directly in profit or loss and presented in other income (expenses), net, together with foreign exchange gains and losses. Impairment losses are presented in administrative expenses in the statement of total comprehensive income.

The Group's financial assets at amortized cost consist of cash and cash equivalents, trade receivables, due from related parties and refundable deposits (Note 22.2.1).

- FVOCI: Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest income and foreign exchange gains and losses which are recognized in profit or loss. When the financial asset is derecognized, the cumulative gain or loss previously recognized in OCI is reclassified from equity to profit or loss and recognized in other income (expenses), net. Interest income from these financial assets is included in other income (expenses), net, using the effective interest rate method. Foreign exchange gains and losses are presented in other income (expenses), net and impairment expenses are presented as separate line item in the statement of total comprehensive income.

The Group does not have debt instruments financial assets that are measured at FVOCI.

- FVPL: Assets that do not meet the criteria for amortized cost or FVOCI are measured at FVTPL. A gain or loss on a debt investment that is subsequently measured at FVTPL is recognized in profit or loss and presented within other income, net, in the period in which it arises.

The Group's financial assets at FVPL consists of investments in mutual funds (Note 22.2).

Equity instruments - subsequent measurement

The group subsequently measures all equity investments at fair value. Where the Group's management has elected to present fair value gains and losses on equity investments in OCI, there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the equity investment. Dividends from such investments continue to be recognized in profit or loss as other income when the Group's right to receive payments is established.

Changes in the fair value of financial assets at FVPL are recognized in other gains/(losses) in the statement of profit or loss as applicable. Impairment losses (and reversal of impairment losses) on equity investments measured at FVOCI are not reported separately from other changes in fair value.

The Group's equity instrument financial assets that are measured at FVOCI consists of investments in listed shares and proprietary golf club shares (Note 22.2)

23.2.4 Impairment of financial assets

The Group assesses on a forward-looking basis the expected credit loss associated with its financial assets carried at amortized cost. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

With the exception of purchased or originated credit impaired financial assets, expected credit losses are required to be measured through a loss allowance at an amount equal to:

- 12-month expected credit losses (ECLs) - these are ECLs that result from default events that are possible within 12 months after the reporting date (or for a shorter period if the expected life of the instrument is less than 12 months); or
- Lifetime ECLs - these are ECLs that result from all possible default events over the expected life of a financial instrument or contract asset.

(i) Simplified approach

The Group applies the simplified approach to provide for ECLs for all trade receivables arising from contracts with third party customers. The simplified approach requires the loss allowance to be measured at an amount equal to lifetime ECLs.

(ii) General approach

The Group applies the general approach to provide for ECLs on all other financial instruments. Under the general approach, the loss allowance is measured at an amount equal to 12-month ECLs at initial recognition.

At each reporting date, the Group assesses whether the credit risk of a financial instrument has increased significantly since initial recognition. When credit risk has increased significantly since initial recognition, loss allowance is measured at an amount equal to lifetime ECLs.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Group's historical experience and informed credit assessment and includes forward-looking information.

The Group considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Group in full, without recourse by the Group to actions such as realizing security (if any is held); or
- the financial asset is more than 90 days past due or longer depending on the historical experience with particular customers.

The maximum period considered when estimating ECLs is the maximum contractual period over which the Group is exposed to credit risk.

Credit-impaired financial assets

At each reporting date, the Group assesses whether financial assets carried at amortized cost are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit impaired includes the following observable data:

- significant financial difficulty of the counterparty;
- a breach of contract such as actual default; or
- it is probable that the borrower will enter bankruptcy or other financial reorganization.

Impairment losses and subsequent recoveries on financial assets are presented in administrative expenses within operating profit.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized (such as an improvement in the debtor's credit rating), the reversal of the previously recognized impairment loss is recognized in profit or loss. Reversals of previously recorded impairment provision are based on the result of management's update assessment, considering the available facts and changes in circumstances, including but not limited to results of recent discussions and arrangements entered into with customers as to the recoverability of receivables at the end of the reporting period. Subsequent recoveries of amounts previously written-off were credited against operating expense in profit or loss.

23.3 Financial liabilities

23.3.1 Classification and presentation

The Group classifies its financial liabilities in the following categories: (a) financial liabilities at fair value through profit or loss (including financial liabilities held for trading and those that are designated at fair value) and (b) financial liabilities at amortized cost. The classification depends on the purpose for which the financial liabilities were incurred. Management determines the classification of its financial liabilities at initial recognition.

The Group did not hold financial liabilities at fair value through profit or loss during and at the end of each reporting period.

Financial liabilities at amortized cost

Financial liabilities that are not classified as at fair value through profit or loss fall into this category and are measured at amortized cost. They are included in current liabilities, except for maturities more than twelve months after reporting date which are classified as non-current liabilities.

The Group's financial liabilities at amortized cost consist mainly of trade payables and other liabilities (excluding payables to government agencies for value-added tax, withholding and other taxes), due to related parties, lease liabilities, bonds payable and borrowings.

23.3.2 Initial recognition and subsequent measurement

The Group recognizes a financial liability in the consolidated statement of financial position when the Group becomes a party to the contractual provisions of the instrument.

The Group's financial liabilities at amortized cost are initially measured at invoice amount, which approximates fair value plus transaction costs. Subsequently, these are measured at amortized cost using the effective interest method. Interest expense on financial liabilities is recognized within finance cost, at gross amount, in profit or loss.

23.3.3 Derecognition

Financial liabilities are derecognized when extinguished, that is, when the obligation specified in a contract is discharged or cancelled or when the obligation expires.

23.4 Determination of fair value

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The Group classifies its fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1);
- inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2); and
- inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (Level 3).

The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined by using valuation techniques. These valuation techniques maximize the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in Level 2.

If one or more of the significant inputs is not based on observable market data, the instrument is included in Level 3.

Specific valuation techniques used to value financial instruments include:

- Quoted market prices or dealer quotes for similar instruments.
- The fair value of interest rate swaps is calculated as the present value of the estimated future cash flows based on observable yield curves.
- The fair value of forward foreign exchange contracts is determined using forward exchange rates at the reporting date, with the resulting value discounted back to present value.
- Other techniques, such as discounted cash flow analysis, are used to determine fair value for the remaining financial instruments.

The Group's FVPL and FVOCI financial assets with quoted market price are valued using Level 1 of the fair value hierarchy and those with unquoted market price are measured at cost.

For non-financial assets, the Group uses valuation techniques that are appropriate in the circumstances and applies the technique consistently. The fair value of a non-financial asset is measured based on its highest and best use. The asset's current use is presumed to be its highest and best use.

The fair value of financial and non-financial liabilities takes into account non-performance risk, which is the risk that the Group will not fulfill an obligation.

23.5 Offsetting financial instruments

Financial assets and liabilities are offset, and the net amount reported in the consolidated statement of financial position when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the company or the counterparty.

23.6 Consolidation

23.6.1 Subsidiaries

Subsidiaries are all entities (including structured entities) over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

Inter-company transactions, balances and unrealized gains on transactions between group companies are eliminated. Unrealized losses are also eliminated.

Accounting policies and reporting period of its subsidiaries are consistent with the policies adopted by and the reporting period of the Parent Company.

23.6.2 Business combinations (including common control business combination)

The Group applies the purchase or acquisition method to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair value of the assets transferred, the liabilities incurred to the former owners of the acquiree and the equity interests issued by the Group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Identifiable assets acquired, and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date.

On an acquisition-by-acquisition basis, the Group recognizes any non-controlling interest in the acquiree either at fair value or at the non-controlling interest's proportionate share of the recognized amounts of the acquiree's identifiable net assets.

Acquisition-related costs are expensed as incurred.

If the business combination is achieved in stages, the acquisition date carrying value of the acquirer's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date through profit or loss in the consolidated statement of total comprehensive income.

Any contingent consideration to be transferred by the Group is recognized at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration that is deemed to be an asset or liability is recognized in accordance with PAS 39 either in profit or loss or as a change to other comprehensive income. Contingent consideration that is classified at equity is not re-measured, and its subsequent settlement is not accounted for within equity.

23.6.3 Goodwill

Goodwill is initially measured as the excess of the aggregate of the consideration transferred (including the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree) over the fair value of the Group's share of the identifiable net assets acquired. If this consideration is lower than the fair value of the net assets of the subsidiary acquired, in the case of a bargain purchase, the difference is recognized directly in profit or loss.

For the purpose of impairment testing, goodwill acquired in a business combination is allocated to each of the cash-generating units (CGUs), or groups of CGUs, that is expected to benefit from the synergies of the combination. Each unit or group of units to which the goodwill is allocated represents the lowest level within the Group at which the goodwill is monitored for internal management purposes. Goodwill is monitored at the operating segment level.

Goodwill impairment reviews are undertaken annually or more frequently if events or changes in circumstances indicate a potential impairment. The carrying value of the CGU containing the goodwill is compared to the recoverable amount, which is the higher of value in use and the fair value less costs of disposal. Any impairment is recognized immediately as an expense and is not subsequently reversed.

23.6.4 Changes in ownership interests in subsidiaries without change of control

Transactions with non-controlling interests that do not result in loss of control are accounted for as equity transactions that is, as transactions with the owners in their capacity as owners. For purchases from non-controlling interests, the difference between any consideration paid and the relevant share acquired in the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to non-controlling interests are also recorded in equity.

23.6.5 Disposal of subsidiary

When the Group ceases to have control, any retained interest in the subsidiary is re-measured to its fair value at the date when control is lost, with the change in carrying amount generally recognized in profit or loss. The fair value is the initial carrying amount for purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognized in other comprehensive income in respect of that subsidiary are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognized in other comprehensive income are reclassified to profit or loss.

If the Group surrenders control to a related party within the group it ultimately belongs, the difference between the consideration received and the fair value of the subsidiary at divestment date, is recognized as other charges to equity.

23.7 Inventories

Inventories are stated at the lower of cost and net realizable value (NRV). Finished goods are carried at actual manufacturing costs. Cost of raw materials used in production is measured using First-in First-out method (FIFO) while conversion costs, particularly direct labor and overhead, are initially measured at standard cost per production batch but subsequently adjusted to actual conversion costs, except for those in process inventories. Inventories in transit are valued at invoice cost including related importation costs. The cost of inventories excludes borrowing costs. NRV is the estimated selling price in the ordinary course of business, less cost to complete and to sell.

Allowance for inventory obsolescence and obsolescence is provided, when necessary, based on management's review of inventory turnover and projected future production demands, and is recognized in profit or loss. Provision for inventory obsolescence is established for slow moving, and defective inventories based on physical inspection and management evaluation. Inventories and its related allowance account are written off when the Group has determined that the related inventory is already obsolete and damaged. Destruction of the obsolete and damaged inventories is made in the presence of regulatory agencies.

Reversals of previously recorded impairment provisions are credited against provision within cost of sales account in profit or loss based on the result of management's update assessment, considering available facts and circumstances, including but not limited to net realizable value at the time of disposal.

23.8 Claim for input VAT, prepayments and other current assets

23.8.1 Claim for input VAT and prepaid taxes

Claims for input VAT and prepaid taxes is stated at face value less allowance for impairment, if any. They are included in current assets, except for those expected to be utilized after twelve months after the reporting date, which are classified as non-current assets.

The Group, on a continuing basis, makes a review of the status of the claim which is designed to identify those that may require provision for impairment. Provision for unrecoverable input VAT and prepaid taxes, if any, is maintained by the Group at a level considered adequate to provide for potential uncollectible portion of the claim.

A provision for unrecoverable input VAT and prepaid taxes is established when there is objective evidence that the Group will not be able to recover the claim or portions thereof. The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognized in profit or loss. Write-off is recognized upon receipt and acceptance of a formal notice of disallowance from tax authorities that is not subject to appeal.

Claims for input VAT and prepaid taxes is derecognized when actually collected, applied against taxes due or disallowed by tax authority.

23.9 Property, plant and equipment

Property, plant and equipment is subsequently measured at cost. Depreciation is computed on the straight-line method to allocate the cost of each asset, less its residual value, if any, over its estimated useful life (in years), determined based on the Group's historical information and experience on the use of such assets, as follows:

Building and building improvements	3 to 40
Leasehold improvements	1 to 5
Transportation and delivery equipment	5
Office furniture and fixtures	5 to 10
Tools, machinery and equipment	5 to 40

23.10 Impairment of non-financial assets

Non-financial assets that have an indefinite useful life, such as goodwill, are not subject to amortization and are tested annually for impairment. Other non-financial assets, mainly property, plant and equipment, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less cost to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units or CGUs). Impairment losses, if any, are recognized in profit or loss.

When impairment loss subsequently reverses, the carrying amount of the asset or cash-generating unit is increased to the revised estimate of its recoverable amount, but the increased carrying amount should not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset or CGU in prior years. Reversals of an impairment loss are credited in profit or loss.

23.11 Current and deferred income tax

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period in the countries where the company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation and considers whether it is probable that a taxation authority will accept an uncertain tax treatment. The Group measures its tax balances either based on the most likely amount or the expected value, depending on which method provides a better prediction of the resolution of the uncertainty.

Deferred tax assets are recognized only if it is probable that future taxable amounts will be available to utilize those temporary differences and losses.

23.12 Borrowings and borrowing costs

23.12.1 Borrowings, including bonds payable

Borrowings are recognized initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortized cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognized in profit or loss over the period of the borrowings using the effective interest method.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least twelve months after the reporting date.

Borrowings are derecognized when extinguished or paid, or when the obligation is discharged, cancelled or has expired.

23.12.2 Borrowing costs

Borrowing costs incurred for the construction of any qualifying asset, if any, are capitalized during the period of time that is required to complete and prepare the asset for its intended use.

Other borrowing costs are recognized and charged to profit or loss in the period in which these are incurred.

23.13 Revenue recognition

Revenue is measured based on the consideration which the entity is expected to be entitled to for the sale of goods and services in the ordinary course of the Group's activities. The Group recognizes revenue when it transfers control over a product or performs service to a customer.

Revenue is recognized as follows:

23.13.1 Sale of goods

Sale of goods are recognized in profit or loss when the Group has delivered the products to the customer and there is no unfulfilled obligation that could affect the acceptance of the products (point in time). Delivery does not occur until the products have been shipped to the agreed specific location, the risk of obsolescence and loss has been transferred to the customer, and the customer has accepted the products in accordance with the sales contract.

Sale of goods is shown net of returns, and/or discounts in the consolidated statement of total comprehensive income.

Sales price are agreed with customers upon order and credit terms vary from COD up to 90 days.

There are no warranties and other similar obligations for refunds agreed with customers for sale of goods.

23.13.2 Management and shared service fees

Service fees from management and shared services agreements are stand-ready performance obligation recognized in profit or loss overtime while the services are being rendered in accordance with the agreements.

23.13.3 Dividend income

Dividend income is recognized in profit or loss when the right to receive payment is established.

23.13.4 Interest income

Interest income from cash in banks and short-term investments, which is presented net of final taxes paid or withheld, is recognized in profit or loss on a time-proportion basis using the effective interest method.

23.13.5 Other income

Income from lighterage and sale of equipment is recognized in profit or loss when obligations have been rendered and accepted by the customer in accordance with the relevant agreements.

All other income items are recognized in profit or loss when earned.

23.14 Employee benefits

23.14.1 Retirement benefit obligation

The Group has a defined benefit retirement plan in accordance with the local conditions and practices in the Philippines. The plan is generally funded through payments to trustee-administered funds as determined by periodic actuarial calculations. Defined benefit plans define an amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation.

The liability (or asset) recognized in the consolidated statement of financial position is the present value of the defined benefit obligation less fair value of the plan assets at the reporting date. In cases when the amount determined results in an asset, the Group measures the resulting asset at the lower of such amount determined and the present value of any economic benefits available to the Group in the form of refunds or reductions in future contributions to the plan. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of government bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity which approximate the terms of the related retirement benefit obligation.

When the Group has a surplus in a defined benefit plan, the Group measures the net defined benefit asset at the lower of the surplus in the defined benefit plan, and the asset ceiling determined using the same discount rate in determining the present value of defined benefit obligations. The amount of the asset recognized should not exceed the aggregate of the present values of any refunds expected from the plan; and any expected reduction in future contributions arising from the surplus.

Plan assets are those that are: (a) held by an entity (a fund) that is legally separate from the Group, (b) available to be used only to pay or fund employee benefits; and (c) not available to the Group's creditors, and cannot be returned to the Group unless: (i) the remaining assets of the fund are sufficient to meet all the related employee benefit obligations of the plan or the Group; or (ii) the assets are returned to the Group to reimburse for employee benefits advanced by the Group. Plan assets exclude investments in group shares that are not transferrable.

Remeasurement gains or losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to equity (within reserve for remeasurement on retirement benefit) in other comprehensive income in the period in which they arise.

Past service costs are recognized immediately in profit or loss.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets.

Termination benefits

Termination benefits are payable when employment is terminated by the Group before the normal retirement date, or whenever an employee accepts voluntary redundancy in exchange for these benefits. The Group recognizes termination benefits at the earlier of the following dates: (a) when the Group can no longer withdraw the offer of those benefits; and (b) when the Group recognizes costs for a restructuring that is within the scope of PAS 37 and involves the payment of termination benefits. In the case of an offer made to encourage voluntary redundancy, the termination benefits are measured based on the number of employees expected to accept the offer. Benefits falling due more than twelve months after the end of the reporting period are discounted to their present value.

23.14.2 Salaries and wages, and other short-term benefits

Liabilities for wages and salaries, including non-monetary benefits and accumulating sick leave that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognized in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented within trade payables and other liabilities in the consolidated statement of financial position.

23.15 Leases

When the Group enters into an arrangement, comprising a transaction or a series of related transactions, that does not take the legal form of a lease but conveys a right to use an asset or is dependent on the use of a specific asset or assets, the Group assesses whether the arrangement is, or contains, a lease. The Group does not have such arrangements during and at the end of each reporting period.

23.15.1 The Group is the lessee

The Group recognizes leases as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use.

Assets and liabilities arising from a lease are initially measured on a present value basis. The interest expense is recognized in the profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The right-of-use asset is depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis.

Measurement of lease liabilities

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, which is generally the case for the Group's leases, the lessee's incremental borrowing rate is used, being the rate that the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic environment with similar terms, security and conditions.

To determine the incremental borrowing rate, the Group:

- where possible, uses recent third-party financing received by the individual lessee as a starting point, adjusted to reflect changes in financing conditions since third party financing was received,
- uses a build-up approach that starts with a risk-free interest rate adjusted for credit risk for leases held for entities which do not have recent third-party financing, and
- makes adjustments specific to the lease (i.e., term, currency and security).

Extension and termination options

In determining the lease term, management considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. Extension options (or periods after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated). The lease term is reassessed if an option is actually exercised (or not exercised) or the Company becomes obliged to exercise (or not exercise) it.

The assessment of reasonable certainty is revised only if a significant event or a significant change in circumstances occurs, which affects this assessment, and that is within the control of the lessee.

Short-term leases

Payments associated with short-term leases are recognized on a straight-line basis as an expense in the profit or loss. Short-term leases are leases with a lease term of 12 months or less.

23.16 Segment reporting

Reportable segments are presented by aggregating operating segments based on similar products and services. The accounting policies used to recognize and measure the segment's assets, liabilities and profit or loss is consistent with those of the consolidated financial statements.

23.17 Related party relationships and transactions

Related party relationship exists when one party has the ability to control, directly or indirectly through one or more intermediaries, the other party or exercises significant influence over the other party in making financial and operating decisions. Such relationship also exists between and/or among entities which are under common control with the reporting enterprise, or between and/or among entities and its key management personnel, directors, or its shareholders. In considering each possible related party relationship, attention is directed to the substance of the relationship, and not merely the legal form.

23.18 Foreign currency transactions and balances

Items included in the financial statements of each of the Group's subsidiaries are measured using the currency of the primary economic environment in which the Group's subsidiaries operate (the "functional currency"). The consolidated financial statements are presented in Philippine Peso, which is the Parent Company's functional and presentation currency.

23.19 Subsequent events (or events after the reporting date)

Subsequent events that provide additional information about the Group's financial position at reporting date (adjusting events) are reflected in the financial statements. Subsequent events that are not adjusting events are disclosed in the notes to the financial statements when material.

24 Reclassifications

The Group has restated the consolidated statements of cash flows from the following reclassification:

- The movement of advances to contractors amounting to P43,276,313 in 2024 and P107,273,008 in 2023 relate to the Group's property, plant and equipment which should have been presented within cash flows from investing activities instead of within cash flows from operating activities.

The impact of this reclassification is accounted for as follows:

- Consolidated statement of cash flows for the year ended December 31, 2024

	As previously presented	Effect of adjustment	As restated
Net cash provided by operating activities	47,523,299	(43,276,313)	4,246,986
Net cash used in investing activities	(1,083,204,593)	43,276,313	(1,039,928,280)
Cash and cash equivalents, December 31	2,837,928,091	-	2,837,928,091

- Consolidated statement of cash flows for the year ended December 31, 2023

	As previously presented	Effect of adjustment	As restated
Net cash provided by operating activities	2,654,145,769	(107,273,008)	2,546,872,761
Net cash used in investing activities	(1,432,138,238)	107,273,008	(1,324,865,230)
Cash and cash equivalents, December 31	2,844,171,390	-	2,844,171,390

The reclassifications above do not impact the consolidated statements of financial position, consolidated statements of total comprehensive income and consolidated statements of changes in equity as at and for the years ended December 31, 2024 and 2023, respectively.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Based on the Unaudited Consolidated Results for the Period Ended March 31, 2026)

Business Overview

The Company is the holding company for a group of companies with interests in the customization, development, and manufacturing of food ingredients (Oleo-Fats, Incorporated and D&L Premium Foods Corp.), oleochemicals, resins, and powder coating (Chemrez Technologies, Inc., Natura Aeropack Corporation and Chemrez Technologies LLC), colorants, additives, and engineered polymers for plastics (D&L Polymer and Colours, Inc., and First in Colours, Inc.) as well as the manufacturing of consumer products for personal and home care and other applications (Aero-Pack Industries, Inc. and Natura Aeropack Corporation). The Company’s registered office address and principal place of business is 65 Calle Industria Brgy. Bagumbayan, Quezon City.

The Company is a publicly-listed company, which was officially listed in the Philippine Stock Exchange (PSE) on December 12, 2012. As of March 31, 2026, the Company is 64%-owned by Jadel Holdings Co., Inc. (JHI) and 11% directly owned by the Lao family. The public holds the remaining 25% of the shares outstanding.

D&L’s major subsidiaries are as follows:

- *Food ingredients* – The Company, operating through its subsidiary Oleo-Fats, Incorporated (OFI) and through D&L Premium Foods Corp. (DLPF), manufactures a line of bulk and specialty fats and oils, culinary and other specialty food ingredients. The Company contract manufactures and provides food ingredient products to most of the leading food manufacturers and quick-service restaurant

chains in the Philippines, and also produces food safety solutions such as cleaning and sanitation agents for various customers.

- *Oleochemicals, resins and powder coatings* – The Company, through Chemrez Technologies, Inc. (CTI) and its subsidiaries Chemrez Product Solutions, Inc. (CPSI) and Chemrez Technologies LLC (CT LLC), and through Natura Aeropack Corporation (NAC), focus on developing, manufacturing, and supplying high value customized resins, oleochemicals, and specialty products that are sustainable and cost-efficient, while enabling customers to build bigger markets. Its customer base includes many industries such as biofuels, personal and home care, health and nutrition, and construction industries. CTI, CPSI and NAC serve local and international customers.
- *Colorants and plastics additives* – The Company, operating through its subsidiaries First in Colours, Inc. (FIC) and D&L Polymer and Colours, Inc. (DLPC), develops and manufactures innovative plastic solutions that make plastics aesthetically appealing, functional, and sustainable. The group's products are mainly classified as plastic colorants, additive masterbatches, and engineered polymers. Plastic colorants give plastics precise coloring and special effects mainly used for brand and product identification. Additive masterbatches add functional features to plastics such as higher processability, antimicrobial properties, and anti-static properties. Meanwhile, engineered polymers are plastic compounds that have improved mechanical and thermal properties that make them ideal for films, bottles, furniture, appliances, electronic and automotive parts, etc. Lastly, the group offers sustainable options such as compostable plastics, biodegradable plastics, bio-based plastics, recycled compounds, and upcycled materials.
- *Consumer Products ODM* – The Company, operating through its subsidiary Aero-Pack Industries, Inc., and through Natura Aeropack Corporation (NAC), is a full original design manufacturer (ODM) and original equipment manufacturer (OEM) that offers customized aerosols and non-aerosols products to other businesses across different industries such as home care, personal care, and maintenance chemicals. The Company offers a full turnkey solution from product formulation to design, packaging, production, and delivery to customers. It is the first and the biggest aerosol manufacturing company in the Philippines with almost all of its sales coming from the domestic market.

Results of Operations

For three months ended March 31, 2026 versus March 31, 2025

- D&L Industries' recurring income reached P717 million, or earnings per share of P0.10 in the first quarter of 2026 (1Q26). This is higher by 5% YoY and 12% QoQ, amidst the high uncertainty and volatility for the period due to the war in the Middle East. Earnings growth was mainly driven by the improvements in margins, as well as the consistent profitability at our Batangas plant, which booked its 6th consecutive profitable quarter.
- Despite a continued challenging first quarter, D&L Industries delivered 5% earnings growth, underscoring the resilience of its business model. Over the past periods, the company has navigated significant volatility—from a sharp surge in coconut oil prices, one of its key raw materials, to the recent oil price shocks arising from geopolitical tensions in the Middle East. The essential nature of its products, catering to basic needs, provides a stable foundation even during periods of disruption. At the same time, its diversified business model offers resilience, allowing strength in one segment to offset softness in another

- With coconut oil—one of the company’s key raw materials—stabilizing at around USD 2,200/MT following a highly volatile period, margins continued to recover in 1Q26. Blended gross profit margin (GPM) improved to 13.4%, up 0.7 ppts YoY, reflecting easing input cost pressures and continued price pass-through. The High Margin Specialty Products (HMSP) segment delivered a more pronounced expansion, with GPM increasing by 2.8 ppts.
- Meanwhile, the conflict in the Middle East pushed crude oil prices above USD 100/bbl and disrupted global supply chains, affecting several petrochemical-based raw materials. While near-term price movements remain uncertain, the company continues to rely on its price pass-through mechanisms and strong supplier partnerships to navigate the volatility. It also maintains approximately two months of inventory, providing a buffer against supply and price shocks.
- Exports stood at 24% of total sales for the quarter. With low hanging fruits and markets that have yet to be penetrated, D&L sees a significant potential upside for this segment. Over the medium-term, the company targets exports to account for 50% of total sales.

	FY21	FY22	FY23	FY24	FY25	3M25	3M26
export as % of total sales	33%	31%	27%	30%	26%	34%	24%

- Gross profit for the first three months of the year decreased by 5% to P1.7 billion from P1.8 billion from the same period last year, largely due to lower sales volume.
- Operating expenses were lower by 4% YoY for the period mainly due to lower delivery charges associated with lower volumes for the period.
- The Company booked other operating income of P91 million in the first three months of the year mainly from its unrealized forex gains due to the depreciation of the peso.
- Finance costs increased by 15% YoY to P350 million from P304 million mainly due to higher debt levels compared to the same period last year.
- Income tax expense was lower by 38% YoY at P73 million due to the income tax holiday relating to the new plant in Batangas.
- FCF turned positive at P339 million for the period. This was largely a result of lower incremental working capital requirements with the normalization of coconut oil prices coupled with muted capex. Barring any price shocks and significant working capital requirements, the company expects FCF to remain positive. The company doesn’t anticipate any major capex spending in the near-term following the completion of the Batangas plant. With FCF turning positive and capex remaining muted, the company has ample room to deliver its balance sheet.
- Amid a challenging operating environment, the company delivered continued growth, driving further improvement in return ratios. ROE rose to 12.2% (+0.9 ppt vs end-2025), while ROIC increased to 9.9% (+0.6 ppt vs end-2025). As the Batangas plant ramps up and contributes more meaningfully to earnings, return ratios are expected to continue improving.
- Meanwhile, the company’s balance sheet remained in a solid position even with the huge capex and unprecedented increase in commodity prices over the past couple of years. As of end-March

2026, interest cover remained at a comfortable level of 3x. Net gearing started to trend lower at 90% in 1Q26 from 98% as of end-December 2025. Average cost of debt was slightly lower at 5.9% vs 6.01% as of end-December 2025.

Segment Operations

- The **Food Ingredients** business saw a softer start to the year, with volumes declining 28% YoY and revenues down 16% YoY, resulting in a 69% YoY drop in earnings. This largely reflects ongoing portfolio optimization - the rationalization of lower-margin commodity exposure - as well as a high base in the prior period when volumes grew 33% YoY — a level not sustained this quarter amid external headwinds. As a net fuel importer, the Philippines was negatively affected by the oil price shock arising from geopolitical tensions, which raised food input costs and dampened foot traffic in certain segments of the food industry. Encouragingly, margins showed early signs of recovery on a sequential basis, with blended GPM improving by 0.5 ppt QoQ. On a YoY basis, HMSP GPM expanded by 4.1 ppts, reflecting a stronger contribution from higher-value segments. As portfolio optimization progresses and coconut oil prices continue to normalize, the segment is well-positioned for more stable and improved profitability moving forward.
- **Chemrez** sustained its strong growth momentum in 1Q26, with earnings rising 34% YoY, building on an exceptional 96% YoY growth in FY25. This performance was driven primarily by robust export sales of higher value-added coconut-derived products, as the company continues to expand into new markets and develop broader product applications. Looking ahead, Chemrez remains optimistic about its medium-term outlook. With the Batangas plant now fully operational, Chemrez is well-positioned to serve a wider global customer base and scale up the production of higher value-added, sustainable ingredients.
- The **Specialty Plastics segment** delivered solid performance for the period, with earnings increasing 22% YoY, driven by 11% volume growth and a 0.4 ppt expansion in margins. Amid supply chain disruptions due to the war in the Middle East affecting petroleum-derived products, a key raw material in the plastics industry, the company was able to cement its position as a reliable partner to its customers by demonstrating its ability to secure critical inputs and ensure continuity of supply in a challenging environment. Over the longer term, successful new product developments—built on decades of R&D — continue to support margin expansion. The segment remains well-positioned for sustained growth, underpinned by ongoing investments in innovation and a focus on delivering higher-value, sustainable plastic solutions aligned with evolving customer requirements.
- **Consumer Products ODM** delivered strong growth, with earnings rising 65% YoY, driven by 14% volume growth and a 2.2 ppt expansion in margins as the Batangas plant continues to ramp up. The segment is well-positioned for further growth, supported by additional capacity from the new facility and ongoing efforts to expand its presence in export markets.

Financial Condition

Period ended March 31, 2026 versus Period ended December 31, 2025

- The company remains in a good liquidity position as current ratio stood at 1.19x as of end March 2026.
- Cash increased by P253 million to P3.65 billion.
- Receivables decreased by 1% during the period to P8.88 billion from P8.98 billion in FY25. Meanwhile, average account receivable days stood at 44 days vs 45 days in FY25.
- Inventories increased by 27% to P15.84 billion from P12.46 billion in FY25. Average days in inventory stood at 70 days vs 74 days in FY25.
- Net debt to equity ratio stood at 90%. Borrowings stood at P24.95 billion.
- Total equity increased by P 707 million to P23.58 billion largely due to income booked for the period.
- FCF turned positive at P339 million for the period. This was largely a result of lower incremental working capital requirements with the normalization of coconut oil prices coupled with muted capex.

- Net cash generated by operating activities amounted to P462 million.
- Net cash used in investing activities amounted to P105 million.
- Net cash used in financing activities amounted to P119 million.

D&L's Plan of Operation for 2026

The Batangas plant turned profitable in 2024, ahead of the original two-year target. In 2025, it sustained consistent profitability and became a stable contributor to earnings, validating the scale, efficiency, and strategic value of the investment.

2025 was marked by an unprecedented increase in coconut oil prices, a key raw material. Despite this volatility, the Company managed to grow earnings by 11%, reflecting the underlying strength of its business.

Management remains focused on increasing Batangas utilization while advancing its medium-term objectives of expanding higher-margin businesses and growing exports to 50% of revenues.

For 2026 and beyond, the Company will continue to prioritize R&D to drive innovation across its portfolio. By deepening its technical capabilities and expanding its pipeline of differentiated products, D&L aims to strengthen its competitive position, enhance margin resilience, and deliver sustainable long-term growth across its core business segments.

Basis of preparation

The principal accounting policies adopted in the preparation of these condensed consolidated interim financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated.

This condensed consolidated interim financial statements for the three-month period ended March 31, 2026 has been prepared in accordance with Philippines Accounting Standard (PAS) 34 Interim Financial Reporting.

The condensed consolidated interim financial statements do not include all the notes normally included in annual financial statements. Accordingly, this report is to be read in conjunction with the annual financial statements for the year ended December 31, 2025 and any public announcements made by the Company during the three-month period.

The accounting policies adopted are consistent with those of the previous financial year and corresponding interim reporting period, except for the estimation of income tax.

There are no new accounting standards or amendments effective January 1, 2026 that have a material impact on these condensed consolidated interim financial statements.

There are no other future standards, amendments or interpretations that are effective beginning on or after January 1, 2026 that are expected to have a material impact on the Company's financial statements.

Selected Notes to the Interim Consolidated Financial Statements

In compliance with the requirements of the Securities Regulations Code

1. The same accounting policies and methods of computation were followed in the interim consolidated financial statements consistent with those adopted for the Company's annual consolidated financial statements for the year ended December 31, 2025.
2. Interim operations do not follow any particular seasonal or cyclical pattern. Except as discussed in the foregoing, demand for the Company's products have been historically fairly constant throughout the previous years.
3. Fixed asset additions during the periods pertain to additional fixed asset requirements incurred in the normal course of business operations.
4. There were no items not in the ordinary course of business that affected assets, liabilities, equity, net income, or cash flows that are unusual because of their nature, size, or incidence.
5. There were no changes in estimates of amounts reported in prior interim periods of financial years prior to the commencement of results reporting on a consolidated basis.
6. There were no material off-balance sheet transactions, arrangements, obligations (including contingent obligations), and other relationships of the Company with unconsolidated entities or other persons created subsequent to the end of the interim period that have not been reflected in the financial statements for the period.
7. There were no changes in contingent liabilities or contingent assets since the last annual balance sheet date.
8. Other than what has been disclosed in the foregoing report, there are no existing material contingencies, events or transactions that are material to an understanding of the current interim period.
9. There are no events other than those already disclosed that will trigger direct or contingent financial obligations that are material to the Company, including any default or acceleration of an obligation.
10. There are no trends, demands, commitments, events or uncertainties known to management that will have a material adverse impact on the Company's liquidity.
11. There are currently no material commitments for capital expenditures except as already disclosed.
12. The Company is not aware of any trend, event or transaction that would have a material impact on its results of operations or on its financial condition except as already disclosed.
13. Aside from interest earnings from the Company's cash deposits, there are no significant elements of income or loss that did not arise from the issuer's continuing operations.
14. Any material changes from period to period in any line items of the Company's financial statements that have not been explained in the **Management's Discussion and Analysis** section of this report were the results of normal fluctuations in operations.

15. The interim consolidated financial statements have been prepared in conformity with Philippine Financial Reporting Standards and reflect amounts that are based on the best estimates and informed judgment of management with an appropriate consideration to materiality.

Additional Disclosures on Risk Management and Financial Instruments

1. Financial risk factors

The Company's activities expose it to a variety of financial risks and these activities involve the analysis, evaluation and management of some degree of risk or combination of risks. The Company's overall risk management program focuses on the unpredictability of financial markets, aims to achieve an appropriate balance between risk and return and seeks to minimize potential adverse effects on the Company's financial performance.

Risk management is led by the Chief Risk Officer and overseen by the Board of Directors.

The most important types of risk the Company manages are: credit risk, market risk and liquidity risk. Market risk includes foreign currency exchange, price and interest risks.

2. Components of financial assets and liabilities by category

2.1 Financial assets

Details of the Company's financial assets are as follows:

	March 31, 2026 (Unaudited)	December 31, 2025 (Audited)
<i>Financial assets at amortized cost</i>		
Cash and cash equivalents	3,626,638,753	3,394,160,313
Receivables, gross	9,062,631,758	9,112,693,716

<i>Financial assets at FVPL</i>	50,027,799	41,801,156
<i>Financial assets at FVOCI</i>	327,950,140	388,022,212
	13,614,674,471	13,501,314,204

Receivables are presented gross of allowance for impairment as at March 31, 2026 amounting to P112,500,896(December 31, 2025 - 131,339,613).

The other components of other current and noncurrent assets are considered non-financial assets which include deposits to suppliers, input VAT, creditable withholding taxes and prepayments.

The carrying amounts of financial assets at amortized cost approximate their fair values (Level 1) as the impact of discounting is not considered significant. Financial assets at FVPL and FVOCI are measured at quoted prices (Level 1). Investments in FVPL include investments in open-ended unit investment trust funds that are redeemable anytime and reports daily net asset value.

2.2 Financial liabilities

Details of the Company's financial liabilities, categorized as other financial liabilities at amortized cost at March 31, 2026 and at December 31, 2025 are as follows:

	March 31, 2026 (Unaudited)	December 31, 2025 (Audited)
Trade payables and other liabilities	6,354,144,962	3,323,771,162
Dividends Payable	-	-
Due to related parties	444,314,759	76,548,742
Lease liabilities	1,130,707,916	1,141,018,684
Bonds Payable	1,997,626,485	1,996,323,946
Borrowings	22,955,409,344	23,299,487,284
	32,882,203,466	29,837,149,818

Trade payables and other liabilities exclude amounts due to regulatory agencies and advances from customers as at March 31, 2026 amounting to P49,253,224 and P4,454,142 (December 31, 2025 - P89,224,329 and P40,652, respectively).

The carrying amounts of financial liabilities at amortized cost approximate their fair values (Level 2) due to their short-term nature and/or the impact of discounting is not considered significant.

As at December 31, 2025, estimated fair value (Level 2) of the lease liabilities and bonds payable as it approximates it's carrying amount as it carries market interest rates.

3. Credit Risk

The Company's exposure to credit risk arises primarily from financial assets at amortized cost and financial assets at FVPL.

The Company has prudent credit policies to ensure that sales of its products are made to customers with good credit history. The senior management team, product group heads and the respective sales team perform credit evaluation and monthly review of outstanding receivables as part of the regular performance assessment process. All significant receivables from key customers are monitored for collectability and actual settlement performance, and specific action plans are required for any material overdue amounts from all categories of customers.

The Company's financial assets that are subject to the expected credit loss model are as follows:

	March 31, 2026 (Unaudited)	December 31, 2025 (Audited)	Basis for recognition of ECL
Financial assets at amortized cost			
Cash and cash equivalents	3,618,769,191	3,311,759,768	12-month ECL
Trade and other receivables	9,062,631,758	9,104,901,044	Lifetime ECL
Due from related parties	207,684,452	133,801,505	12-month ECL
Refundable deposits	339,741,569	430,835,302	12-month ECL
Financial assets at FVPL	50,027,799	41,801,156	Marked to market
	13,278,854,769	13,023,098,775	

Cash and cash equivalents exclude cash on hand as at March 31, 2026 amounting to P7,869,562 (2025 - P82,400,545) which is not subject to credit risk.

The maximum exposure to credit risk at the reporting date is the carrying value of financial assets summarized above.

None of the financial assets that are fully performing has been renegotiated as at March 31, 2026 and December 31, 2025.

The Group does not hold any collateral as security to the above financial assets.

Cash in bank

Credit risk exposure arising from cash in bank arises from default of the counterparty, with a maximum exposure equal to the fair value of the financial asset. To minimize credit risk exposure, the Group deposits its cash in banks with good credit ratings.

Cash deposited in these banks are as follows:

	March 31, 2026 (Unaudited)	December 31, 2025 (Audited)
Universal banks	3,618,769,191	3,305,224,736
Thrift banks	-	-
	3,618,769,191	3,305,224,736

While cash in banks are also subject to requirements of PFRS 9, expected credit loss is considered not significant. The Group does not hold any collateral as security to the above financial assets.

Due from related parties

Due from related parties pertain to amounts receivable for sale of inventories and services to related parties. These are non-interest bearing and are collectible generally within 30 to 60 days after transaction date. Due from related parties are fully recoverable. Management does not foresee significant credit risk on the outstanding balances of due from related parties as these are transacted with related parties with strong financial and liquidity positions.

Trade and other receivables

i) Trade receivables

The Company applies the PFRS 9 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for trade receivables arising from sale of goods and services to third parties. To measure the expected credit losses, receivables have been grouped based on shared credit risk characteristics and the historical collection cycle.

The expected loss rates are based on the payment profiles of counterparties over a period of 36 months and the corresponding historical credit losses experienced within this period.

The historical loss rates are adjusted to reflect current and forward-looking information on macroeconomic factors affecting the ability of the customers to settle the receivables.

The Company has identified the Gross Domestic Product (GDP) and the Inflation Rates to be the most relevant factors, and accordingly adjusts the historical loss rates based on expected changes in these factors.

On that basis, the loss allowance as at period end was determined as follows:

March 31, 2026	Low Risk	Moderate Risk	Impaired	Total
Expected loss rate	2.14%	0.08%	-	1.24%
Gross carrying amount - trade receivables	5,112,836,140	3,949,795,619	-	9,062,631,758
Less allowance	(109,405,672)	(3,095,224)	-	(112,500,896)
Net receivables	5,003,430,468	3,946,700,395	-	8,950,130,862

December 31, 2025	Low Risk	Moderate Risk	Impaired	Total
Expected loss rate	0.40%	1.97%	6.58%	1.44%
Gross carrying amount -trade receivables	5,888,781,947	2,246,738,827	969,380,270	9,104,901,044
Loss allowance	(23,309,007)	(44,261,680)	(63,768,926)	(131,339,613)
Net receivables	5,865,472,940	2,202,477,147	905,611,344	8,973,561,431

Trade receivables from its five major customers per segment as at March 31, 2026 and December 31, 2025 are as follows:

March 31, 2026 (Unaudited)	Carrying amount	Neither past due nor impaired	Past due but not impaired			Overdue and impaired
			31 - 60 days	61 - 90 days	Over 90 days	
TOP 5	3,685,245,504	3,491,545,847	76,441,303	-599,115	117,857,468	

December 31, 2025 (Audited)	Carrying amount	Neither past due nor impaired	Past due but not impaired			Overdue and impaired
			31 - 60 days	61 - 90 days	Over 90 days	
TOP 5	2,006,531,840					

ii) Other receivables

Other receivables include loans to officers and employees amounting to P4,809,733 (2025 - P2,030,692). To address credit risk, these advances are subject to liquidation and/or collectible through salary deduction.

Refundable deposits

This account pertains to security deposits on properties leased by the Company. Security deposits are generally refundable at the end of the lease term. Management does not expect significant credit risk on these deposits.

Financial assets measured at FVPL

The Company's investments in debt instruments are considered to have low credit risk. Management considers 'low credit risk' for unit investment trust funds, as they are managed by universal banks with good credit ratings.

4. Market Risk

4.1 Foreign currency exchange risk

The Company's foreign currency denominated monetary assets and liabilities as at March 31 consist of:

	Currency	March 31, 2026 (Unaudited)	Rate	Peso Equivalent	December 31, 2025 (Audited)	Rate	Peso Equivalent
Cash	USD	10,085,511	60.75	612,674,633	5,840,741	58.79	343,377,163
	EUR	593,850	69.63	41,347,566	610,221	69.25	42,257,804
	AUD	357	41.60	14,848	357	39.38	14,059
Receivables	USD	19,783,679	60.75	1,201,818,914	17,736,500	58.79	1,042,728,835
Financial assets at FVPL		-		-			
		30,463,397		1,855,855,960	24,187,819		1,428,377,861
Trade payable and other liabilities	USD	(3,362,229)	60.75	(204,248,669)	(7,416,633)	57.85	(286,164,050)
	EUR		69.63	(195,998)	(134,275)	61.47	(3,856,519)
	SGD	(2,815)			(15,810)	42.08	(1,066,140)
	JPY				(6,627,430)	0.38	(2,518,423)
	AUD				(183,500)	39.38	(7,226,230)
		(3,365,044)		(204,444,667)	(14,377,648)		(455,791,464)

Net assets	27,098,353	1,651,411,293	17,883,641	972,586,397
------------	------------	---------------	------------	-------------

Foreign exchange gain, net for the periods ended March 31 consist of:

	March 31, 2026 (Unaudited)	March 31, 2025 Unaudited)
Realized foreign exchange gain/(loss)	56,646,254	5,207,329
Unrealized foreign exchange gain/(loss)	10,777,591	5,393,024
	67,423,845	10,600,353

Foreign exchange risk arises when future commercial transactions and assets and liabilities are denominated in a currency that is not the Parent Company's functional currency.

The Company manages its foreign currency exchange risk through minimizing foreign currency denominated transactions. Also, the Company maintains sufficient cash in foreign currency to cover its maturing obligations. A market driven change in foreign currency exchange rate, arising from US Dollar denominated assets (liabilities), as at March 31 would lead to immaterial pre-tax profit and equity movements.

4.2 Price risk

As at March 31, 2026, the Company is exposed to price risk in relation to its investments in debt and equity financial assets amounting to P50,027,799 and P327,950,140 respectively (December 31, 2025 - 2025 - P41,801,156, and P388,022,212, respectively). Components of debt and equity financial assets would increase or decrease as a result of gains or losses on these financial assets measured at fair value at the end of each reporting period. Management monitors such financial assets based on the net asset value of the debt instruments (unit investment trust funds) current market price of the shares. These financial assets are managed on an individual basis, and all buy and sell decisions are approved by the Management Committee.

The impact of a market driven change in fair value of the debt and equity investments, with all other variables held constant, would have been immaterial.

4.3 Cash flow and fair value interest rate risk

Cash flow interest rate risk is the risk that the future cash flows of financial assets and liabilities will fluctuate because of changes in market interest rates. Fair value interest rate risk is the risk that the value of financial assets and liabilities will fluctuate because of changes in market interest rates.

Cash flow interest rate risk

The Company's exposure to cash flow interest rate risk pertains to short-term borrowings where the related interests are repriced at periodic intervals based on the prevailing mark-to-market prices, in accordance with the terms of the agreement. The Company's practice is to manage its interest cost by reference to current market rates in borrowings.

The Company's fixed rate borrowings are measured at amortized cost. They are therefore not subject to cash flow interest rate risk as defined in PFRS 7, since neither the carrying amount nor the future cash flows will fluctuate because of a change in market interest rates.

Fair value interest rate risk

Changes in the market interest rates of the Company's financial liabilities with fixed interest rates only affect income if these are measured at their fair value. As such, the Company's financial liabilities with fixed interest rates that are measured at amortized cost are not subject to fair value interest rate risk as defined in PFRS 7.

5. Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash, the availability of funding through an adequate amount of credit facilities and the ability to close out market positions. Due to the dynamic nature of the underlying businesses, the Company aims to maintain flexibility by keeping credit lines available.

On a regular basis, management monitors forecasts of the Company's liquidity reserve on the basis of expected cash flows. The Company places cash in excess of immediate requirements in banks.

The table below summarizes the maturity profile of the Company's non-derivative financial liabilities based on contractual undiscounted payments:

	Due and demandable	Within 12 months	Over 12 months	Total
<i>March 31, 2026</i>				
Trade payables and other liabilities	268,559,376	3,903,378,461	-	4,171,937,837

Bonds Payable and future interest payments		1,996,323,946		1,996,323,946

Lease liabilities and future interest payments	678,253,447	409,628,801	1,087,882,248
	8,746,218	31,010,554,448	881,282,834
			31,900,583,500

The Parent Company, together with its related parties entered into surety agreements with local banks and a corporate guarantee with a foreign bank. The borrowings of the Company are covered by surety agreements and corporate guarantee agreements.

The amounts disclosed in the table are the contractual undiscounted cash flows. Balances equal their carrying balances, as the impact of discounting is not significant.

The Company believes that cash generated from its operating activities and current assets are sufficient to meet maturing obligations required to operate the business. The Company would also be able to meet unexpected cash outflows by accessing additional funding sources from local banks and related parties.

The Company expects to settle the above financial obligations in accordance with their maturity date. However, the Group may consider to roll-over short-term loans based on working capital requirements.

Capital management

The Company's objective when managing capital is to generate the maximum possible returns for its shareholders while taking on a manageable degree of risk ensuring that the Company will continue to expand business and manufacturing facilities.

In order to maintain or adjust the capital structure, the Company reviews its capital structure from time to time to assess the proper financing mix necessary to grow and sustain its operations. As a matter of policy, capital expenditures have been financed from internally-generated cash flow while working capital requirements will be augmented by short-term bank borrowings from time to time.

Earnings in excess of dividend distribution to shareholders have been continuously redeployed and reinvested in the growth of the Company's business. Each instance of expansion of manufacturing capacity and entry into new products and markets undergo a thorough evaluation process to ensure that such investments and marketing programs are in consonance with the Company's core competencies and would be enhancing, rather than diminishing, shareholder value in the long run.

As part of the reforms of the PSE to expand the capital market and improve transparency among listed firms, PSE required a minimum percentage of ten percent (10%) of the listed companies' issued and outstanding shares, exclusive of any treasury shares, to be held by the public. On May 31, 2017, the SEC issued a Memorandum Circular to increase the minimum percentage requirement to at least fifteen percent (15%) on or before the end of 2018 and then to at least twenty percent (20%) on or before the end of 2022. The Parent Company is compliant with respect to this requirement.

Total capital is equal to total equity (excluding any reserves) as shown in the consolidated statements of financial position.

	March 31, 2026 (Unaudited)	December 31, 2025 (Audited)
Total equity	23,576,198,719	22,869,204,365
Reserves	(326,291,291)	(337,716,804)
	23,249,907,428	22,531,487,561

There are no changes to the Company's capital management policies as at March 31, 2026 and December 31, 2025.

V. APPROVAL OF ANNUAL REPORT AND FINANCIAL STATEMENTS

Proceeding with the agenda, Mr. Alvin D. Lao, President and CEO, presented to the stockholders the Annual Report and the Audited Financial Statements as of December 31, 2024.

**NOTE: THIS VERSION IS STILL FOR APPROVAL
OF THE STOCKHOLDERS AT THE NEXT ASM**

Mr. Alvin D. Lao reported that in 2024, the Company's recurring income reached by Php 2.3 billion, or earnings per share of 32.8 centavos. It was noted that this is 2% higher year-on-year. Despite higher operating and interest expenses associated with the Batangas Plant, the Company's continuous ramp up in operations helped offset the incremental expenses incurred.

It was reported that in 2024, the Batangas Plant was fortunately profitable. As a result, the Company was able to book a net profit of Php 246 million in the 4th quarter of the year, compared to the Php 333 million net profit booked in the 1st quarter of that same year. It was noted that this was ahead of the Company's initial schedule or target, which anticipated profitability within the first two (2) years of operations at the Batangas Plant, based on the performance of other plants the Company had built in previous years.

The Batangas Plant continues to ramp up its operations effectively. Comparing 1st quarter of 2025 to 4th quarter of 2024, its quarterly income is 35% higher. These positive results give the Company confidence that, over time, its industry-leading facilities at the Batangas Plant will continue to play an increasingly significant role in boosting the Company's overall net income. The Company believes it has only just begun to tap into its transformational potential, given the vast opportunities present in both local and international markets.

Driven by the boost from the Batangas Plant, the Company's net income increased by 10% in the 1st quarter of 2025, reaching Php 681 million, compared to Php 618 million in the 1st quarter of 2024, despite the macroeconomic uncertainties experienced by the Company during the 1st quarter of 2025. With the increasing income contribution from the Batangas Plant, the Company's return ratios have begun to show improvement. As a result, return on equity stood at 12.1% for the quarter higher by 1.4% from the full-year levels in 2024. On the other hand, return on invested capital reached 10% for the quarter higher by 1% from the full-year figure in 2024. The

NOTE: THIS VERSION IS STILL FOR APPROVAL OF THE STOCKHOLDERS AT THE NEXT ASM

Company is targeting a steady improvement in both ratios, aiming to reach mid to high teens over the medium term.

As to the Company's balance sheet, it remains in a solid position even with the huge capital expenditure ("Capex") over the past couple of years and unprecedented increases in commodity prices which translates to higher working capital requirements. As of the end of March 2025, interest cover remained at 4x with net gearing at 92%. Average cost of debt is slightly lower at 6.2% as of end of March 2025 versus the 6.29% as of the end last year.

From a Capex standpoint, the Company does not expect any major capex expenditures in the near term. Capex peaked in 2022 and has been tapering off since the completion of the Batangas Plant. In the 1st quarter of 2025, Capex stood at below Php 200 million, which, when annualized, suggests that full year Capex will come in at below Php 1 billion.

With the help of the Batangas Plant, the Company is on track to achieve its goal of having exports eventually account for at least 50% of the Company's total sales. In the 1st quarter of 2025, export revenues grew by 69% year-on-year, bringing the export contribution to total sales to a record high of 34% for the period. Given the new capabilities and capacity provided by the Batangas Plant, the Company reasonable expects to achieve its target of having exports contribute at least 50% of total revenues within the next couple of years.

Over the long term, the Company remains confident that the new investments made in the past few years will pave the way for higher and more sustainable profit growth. To date, the Batangas Plant has played a key role in opening up new markets, supporting the Company's aspiration to become a "*Truly Global Filipino Manufacturing Company*".

NOTE: THIS VERSION IS STILL FOR APPROVAL OF THE STOCKHOLDERS AT THE NEXT ASM

It was reported that as of 30 May 2025, the Company's market capitalization stands at Php 40 billion, ranking it 58th among the largest companies in the Philippines by market cap.

After the presentation, floor was opened for questions and there was no question with respect to the Annual Report and Audited Financial Statements as of 31 December 2024.

A motion was thereafter made and duly seconded to approve the Annual Report and Audited Financial Statements as of 31 December 2024. There being no objection or questions, and taking into consideration that more than majority of the votes submitted to the Corporation already voted in favor of this agenda item, the stockholders approved the Annual Report and the Audited Financial Statements of the Corporation as of 31 December 2024.

Prior to disclosure of the final tally of votes to the stockholders, stockholders were given a few more minutes to cast their votes on this agenda item through remote communication.

VII. APPOINTMENT OF EXTERNAL AUDITOR

The next item in the agenda was the designation of the Corporation's external auditor. Pursuant to the By-Laws, and the recommendation of the Nomination Committee, the nomination of Isla Lipana & Co. as external auditor was endorsed to the stockholders.

On motion duly made and seconded, without any objection or questions, and taking into consideration that more than a majority of the votes submitted to the Corporation already voted in favor of this agenda item, the stockholders approved the

appointment of Isla Lipana & Co. as the Corporation's external auditor for the year 2025-2026.

Prior to disclosure of the final tally of votes to the stockholders, stockholders were given a few more minutes to cast their votes on this agenda item through remote communication.

Summary of Votes for this matter is as follows:

VI. ELECTION OF DIRECTORS

The Chairman thereafter opened nominations for directors to serve for the term 2025-2026. Pursuant to the By-Laws, the nominations of directors were based on the recommendations of the Nomination Committee. The stockholders were previously given until May 5, 2025 to submit nominations to the Corporate Governance Committee, acting as the Nomination Committee. Only nominations of the seven (7) incumbent directors were submitted and evaluated during the given period. All nominees are found to possess all the qualifications and none of the disqualifications, prescribed for directors, including independent directors.

Based on the evaluation and recommendation of the Corporate Governance Committee, acting as the Nomination Committee, the following individuals are nominated as directors:

1. Mr. Yin Yong L. Lao
2. Mr. John L. Lao
3. Mr. Alvin D. Lao

And the following as Independent Directors:

4. Atty. Mercedita S. Nollo do
5. Dr. Lydia R. Balatbat-Echauz
6. Ms. Corazon S. de la Paz-Bernardo
7. Mr. Karl Kendrick T. Chua

On proper motion duly seconded, unanimously approved, and without any objection, the nomination for directors was closed.

In view of the fact that there were only seven (7) nominees to the seven (7) seats, a motion was made, duly seconded, and unanimously approved without any objection for the above-named nominees/incumbent directors to be elected as Directors of the Corporation without need of ballot to serve as such for the term 2025-2026 and until their successors shall have been elected and qualified.

1. Mr. Yin Yong L. Lao

VIII. OTHER MATTERS

Declaration of Cash Dividends

The Chairman informed the stockholders that at the meeting of the Board of Directors held immediately before the stockholders' meeting, the Board approved the declaration of cash dividends for

stockholders of record as of June 18, 2025, Regular cash dividend of Php0.164 per share and a special cash dividend of Php0.049 per share, or a total of Php0.213 per share, payable on July 2, 2025.

Including this year's dividend, it was reported that the Company has returned a total of 18.3 billion pesos in cash to shareholders through cash dividends since the IPO in December 2012.

Donation to the Lao Foundation, Inc.

The Chairman also reported that the Corporation, based on its previous resolution, has set aside and donated 1% of the net profits of the previous year (2024) to the Lao Foundation, Inc. For 2025, the Group has donated Php 27 million to the Foundation.

The donation is part of the Company's social corporate responsibility and endeavors to empower the marginalized sector of the community through education, values formation, and livelihood programs.

IX. ADJOURNMENT

Prior to the adjournment, the Chairman inquired if there is any other query or matter that the stockholders might want to take up. Ms. Crissa Marie Bondad, the Corporation's Investment Relations Officer, read the questions that were sent via the Zoom chatbox and Q&A Platform.

A question was asked: *"What happened to Dr. Coco products? Why are these gone in supermarkets like Landmark?"* Mr. Alvin Lao clarified that the Company does not technically own Dr. Coco. However, it does manufacture some of the ingredients used in Dr. Coco, as well as provide packaging for them. Based on his understanding, the absence of Dr. Coco in places like Landmark is likely due to a commercial decision. He explained that many retail outlets impose fees and other expenses to sell products, which could have influenced the decision to withdraw from some places

like Landmark. Nevertheless, he assured that Dr. Coco remains available in other retail outlets and can still be purchased online.

There being no other query, the meeting, on motion duly made and seconded, was adjourned at about 9:45 AM.

101 years of professional services experience in the Philippines

On 22 June 1922, we started the journey of rendering professional services in the Philippines

At PwC, our purpose is to build trust in society and solve important problems. We're a network of firms in 151 countries with over 360,000 people who are committed to delivering quality in assurance, advisory and tax services. Find out more and tell us what matters to you by visiting us at www.pwc.com.

Isla Lipana & Co. is PwC in the Philippines

Among the auditing firms in the Philippines, we have the longest affiliation with a major global accounting firm that dates back to 1958. Established in 1922, we became a member firm of the Price Waterhouse Worldwide Organization in 1973. On 1 July 1998, the merger of two venerable firms—Price Waterhouse and Coopers & Lybrand—created PwC.

The Philippine member firms of the PwC network are Isla Lipana & Co., Cabrera and Company, PricewaterhouseCoopers Consulting Services Philippines Co. Ltd., and PricewaterhouseCoopers Business Services Philippines Co. Ltd. — and their affiliate member firms are PricewaterhouseCoopers Services (in Brunei Darussalam) and PricewaterhouseCoopers WMS Pte Ltd - Philippine Branch.

PwC Philippines performs audit, taxation, advisory and Japanese business services

We deliver quality services to our clients through our main office in Makati City and our offices in the cities of Cebu, Iloilo, Davao, Bandar Seri Begawan and Pasig. We now have 47 partners and more than 2,700 professional and support staff.
